

***Top financial expert... who has been recommended by Scottrade to lead their seminars... reveals the ONE consistently reliable method he used to grow his account from \$25,000 to \$800,000...***

## **“14-Year Trading Expert Helps You Profit from the Stock Market by Telling You What to Buy, When to Buy, and When to Sell... Making It Incredibly Easy for You to Book 8% to 10% on Each Trade”**

**Best Part: You Can Try it out Without Risking a Dime.**

**I'm so consistent and reliable when it comes to winning trades... Scottrade asked me to host training seminars all across Texas. My method produced a 177% return last year and already 68% in the past 6 months!**

**Imagine earning an 8%, 10%, even 12% return on every trade you execute! I guarantee you can and I have the proof below... so let me take you inside one of the most consistently profitable and reliable trading strategies ever made available.**

Dear Trader:

How long have you settled for measly returns in the market? How much money has “buy-and-hold” investing cost you in terms of stalled gains, lost gains, or NO gains?

Let's face it. The days of building wealth with slow-growing “buy and hold” methods are over. If you're like most of those investors who decided to stick with “buy and hold” in 2008... ***you saw most of your savings dwindle away.***

So let me ask...are you ready to enjoy steady, consistent, and reliable profits starting today?

If so, I have great news for you. In the next few pages, I'll explain my consistently reliable trading method in detail.

I'll also go through some of my winning trades and show you exactly why I can help you book more profits reliably, consistently, and FAST.

That's right... you can consistently book profitable trades in days.... and NOT years like the old “buy and hold” myth. It's much easier than you might think.

Here's the story. Hi, my name is John Guzman and I've been involved in the stock market since 2001. I've been a licensed Investment adviser since 2008.

For the last 10 years, I've been sending a group of private subscribers a newsletter consisting of some very reliable “do this, then do that” advice. Nothing complicated...just precise recommendations on what to trade, when to enter, and when to exit.

And each week, they follow my advice by placing their trades and have an opportunity to enjoy a remarkably consistent and reliable **8% to 10%** in 2 to 6 days!

## **Some Trades Booked as High as 22% Returns in Days!**

*But on average, my subscribers book a reliable and consistent 8% to 10% like clockwork.*

The extremely successful trading strategy I use has a 10-year history of producing consistent and reliable profits for those who follow my advice.

And quickly too! When I say quickly, I'm talking 8% to 10% booked for each trade on average, and in 3 to 6 days... *or even less.* **Like Tarone Boyd, who has booked a steady 8% to 10% per trade...**

My name is Tarone Boyd and I'm from Lubbock, Texas. I met John at a Scottrade seminar and since then have followed him on Instagram. I've been subscribed to his daily newsletter for almost 3 months now. His analysis and picks are on point. I have steady booked 8-10% per trade with an ease. I've gained over 34% on my portfolio in that time. Almost 75% of his plays behaves as he predicts and majority of plays develop in about a weeks' time. He takes a very conservative approach to his trading, alleviating the gambling mentality. I'll continue to subscribe to his service and attend his seminars

Ordinary people just like you are using my advice to see steady, consistent profits... trade after trade. And they're well on their way to slowly and methodically becoming rich over a period of 10 years or so.

**That's not hype. I've turned my starting capital of \$25,000 into \$800,000 in 10 years.**

## **That's more than ¾ of a MILLION DOLLARS!**

Good luck making those kinds of returns with a savings account, money market, or bank CDs.

Or trading on your own, for that matter. Returns like these come from years of experience... and ONE proven method you can stick with, over and over again.

I'd like to show you how you too can get in on this incredible trading opportunity.

Now, let's stop here for a minute. I'm not trying to promise you overnight riches, or gains of 200% or anything else crazy.

I'm probably the only trader who will NOT B.S you.

I tell it like it is...so you can enjoy a very consistent and reliable 8% to 10% booked on each trade... while other traders continue to look for the "magic bullet of get rich quick".

I know this trading method works, because I developed the system myself. And I've been extremely pleased with the results and profits.

And with hundreds of subscribers still following my trades, I must be doing something right.

So how have I been able to enjoy such consistent returns of 8% to 10% or better?

Well, in the last 14 years in the financial markets, I've traded all types of securities. Stocks, bonds, options, futures and commodities.

I've experimented with all types of strategies to find something that consistently produced returns for me. Day trading, penny stocks, swing trading, holding long/short and options...

## **You Name it... I've Spent Years Trying It**

In the last 14 years I've been in the financial markets, I've gone through 2 big crashes... the tech bubble of 2000 and the housing crisis of 2008.

And not only was I able to weather those 2 storms, but was able to come out ahead!

With more than 14 years of experience in the financial services industry, I've learned how to survive and THRIVE through bear markets, stagnant or bull markets.

**I've grown my portfolio from around 25k to over 800k in a 10 year period using the method I'll share.**

Thankfully... this experience has really helped me enjoy more profits – with limited risk. I say with limited risk because I'm known around here as Mr. Conservative.

After all, safety is important to me... just as much as profitability. A dollar SAVED is just like a dollar EARNED.

And I've been able to find a perfect balance of reliable, consistent profits of 8% to 10%... while also greatly limiting my risk and enjoying a lot of safety with my portfolio.

I don't like losing money and I certainly don't want to risk losing money that could provide a better future for my family.

## **And I Certainly Won't risk my Subscribers' Money**

After all, they're not going to stick around and listen to my advice if they're not seeing a great return with little risk.

In fact, my track record has impressed a lot of financial institutions.

I've been selected by Scott Trade as one of the top traders in the Texas area and have been asked to host seminars to discuss my expertise to up and coming traders.

## **I've been Doing ScottTrade Seminars for 4 years Now**

So even a large billion dollar company feels my strategies work and are reliable, consistent, and SAFE enough where they're willing to have me teach their customers.

Now, what makes me so consistent and reliable when it comes to booking 8% to 10% like clockwork on my trades?

Well, my secret is finding ONE method that has worked well for me... and becoming GREAT at that one method.

See, when I started 14 years ago in the markets... I soon realized relying on so many different methods was too unpredictable, especially if a particular method worked only in a bullish or bearish market.

I wanted to find ONE consistently reliable process that worked in any market -- bull, bear or flat -- that could maximize profits day in and day out. That way, instead of having to worry about a dozen different methods... I could harness my energy and laser focus it on one.

Over the last 10 years... I've come to find out that **swing trading is by far the most consistent and predictable way to profit in the market.**

Having the ability to laser focus my time and efforts on this one market method is what I believe makes my service more profitable than any other.

That's why I designed my newsletter and recommendation service around one of the market's most trusted profit-producers. And if you'd like the opportunity to see solid gains of 8%... 10% or more, then this can do it faster and easier than you ever thought possible.

With swing trading, I'm looking for fast movements by a particular stock. When I say fast, I mean anywhere from one day to four days. I use my experience, charts, technical analysis, and a few other tools to find stocks that have short term price momentum on their side.

I'm not looking for value or long term growth... I'm looking for stocks that have been oversold and about ready to reverse that trend and bounce back... banking some fast and easy gains.

## **It Allows you to Profit FAST and Profit EASY**

**I'm probably the** most conservative trader you'll meet. I hate losing money and I hate taking unnecessary risks with my money as well as my subscribers cash.

My success has been because I've been able to find a perfect balance of profitability and safety. This is why this is the best way I know to consistently beat the market, without putting your cash at risk.

I've been a believer in this strategy ever since I started profiting from it regularly, like clockwork... and enjoying FAR more wins than losses.

Over the years I've tweaked this strategy and found a way to trade this system with an even higher degree of safety, without sacrificing profits.

Needless to say, if I continue to use this strategy... I'm certain that by the time I'm 55...

**I'll Have Several Million Dollars Tucked away!**

If there's an easier way to make a reliable and consistent 10% gain in a matter of a few days... I don't know about it!

Now, you may be thinking: how can I get rich making 8% gains here or 10% gains there?

Quite frankly, I'm looking to get rich *slowly and methodically*... which is really the only way to get rich in the stock market, or any financial market, really.

Seriously, you must know by now that there's no such thing as striking it rich overnight in the stock market. Ordinary investors - the ones that are always looking for 'the next big thing' and who almost always end up broke- will look at my numbers and say 'who cares'.

To them, 8% isn't as incredible as 1,000% that some other website is claiming. But seasoned traders - those who understand how rich a 8% to 10% gain on every trade can make you - they'll see the incredible wealth-building power in those numbers.

And yet, the traders looking for the 1,000% gains will continue to bounce from fairytale promise to fairy tale promise... burning their families money in the process.

**After all, even 2% to 4% monthly gains add up to 24% to 48% annual gains – which** can double your money every one-and-a-half to three years. That's a better return than even the most accomplished traders earn.

## **Care to Turn \$5,000 Into \$1.2 MILLION in Just Five Years?**

Suppose you took just \$5,000 from your portfolio and were able to double it every six months using my consistently reliable system.

After a year you'd have \$20,000. After two years, \$80,000. After three years, \$320,000. After four years, \$640,000. After just five years you'd have \$1,280,000.

**That's over a MILLION BUCKS... all starting with just \$5,000.** And that million is in addition to what you earned on the rest of your portfolio.

Can I guarantee you'll double your money every six months? Of course not.

But what other investment gives you this kind of consistent profit potential with such limited risk? And even if you were only able to double your money every year or two, you'd still be doing far better than 99% of other traders!

I can make it easy for you to profit whether you're a seasoned trader or just starting out. Consistent gains are your ticket to safe, slow, but serious wealth over a span of 10 years.

For the last 10 years now... I've been quietly and consistently helping everyday investors like you make better returns and more money in the market. Every day, I scour the market for outstanding opportunities and then issue my recommendations.

My subscribers have been able to consistently make a lot of money following my advice....

giving them a chance at 10% average gains per trade. With swing trading, I pinpoint stocks that are oversold... so they're ready to move up fast.

## **I'll Find You the Stocks Most Likely to Bounce up Fast**

I'm constantly scanning stocks... finding the ones that are oversold and ready to bounce up fast... so we can get in and out and bank a quick and easy 8% to 10%.

By capitalizing off quick bounces up on a oversold stock, I've been able to consistently book 8% to 10% off these moves throughout the last 10 years.

When finding stocks to swing... I focus on technical analysis, technical indicators, earnings, economic reports, news, sentiment, market/sector trends and risk vs reward.

These are the stocks that can make you money in as little as a few days.

## **Let me Show you the Profits You Can Make...**

Like with CBI... I bought on Aug 13 for \$58.50 and sold less than 2 weeks later ... Aug 25<sup>th</sup>... for \$63.95. **I booked: 9% in 2 weeks.**

***With safe, easy, fast in and out trades like these***, the recommendations my subscribers get will consistently and reliably profit...often in a matter of days.

And in a moment, I'll tell you how you can start getting my recommendations—and begin profiting from what could be the most reliable trading system going today.

But first, I want to show you something that really opened my eyes when I went back and looked at my track record for the past few years. I've been able to recommend many picks that have produced up to 8%, 10%, even 22% **gains** in days...

LUV Buy date: 8/7/14 \$28.06  
Sell date: 8/20/14 \$31.57  
Booked 12%

### **Here's another example.**

TRN Buy date: 8/7 \$41.56  
Sell date: 8/19 \$46.17  
Booked: 11.5%

HPQ Buy date: 8/20 \$35.10  
Sell date: 8/27 \$38.16  
Booked 9%

What's most remarkable, you could have made these gains in a very short time, due to the fact we're in and out of these recommendations (usually with gains) so quickly!

Best of all, you can now receive all of **my** recommendations... the name, symbol, rationale, risks and profit targets. You'll get up to 10 picks per week along with a watch list of about 6 additional stocks.

I'll let you know when to get in and when to get out. Very often, recommendations take off in just a few short days.. returning consistent and dependable 8% to 10% profits like clockwork.

In fact, over the years I've been making recommendations to my subscribers, many of my picks go on to produce 8% to 10% gains... some even as high as 22%.

## **Like ARWR did this July... Booking 22% in just 5 Days!**

In fact, of the executable trades in the calendar year 2013, my portfolio gains were 177%!

Most traders, if they're lucky, MIGHT see 10% when they're doing it on their own.

As I write you today, most of my trades have produced gains ranging from 6% to over 22% in a few short days or weeks.

## **So Far this Year I'm Up 68%!**

When you consider that a mere \$25,000 has grown to over \$800,000 in a 10 year period--these numbers take on a new and exciting meaning.

**I'm sorry if all this seems like boasting** on my part. But my purpose in telling you is just to make clear the tremendous potential for profits my method can bring you.

I wanted to share my knowledge of swing trading -- and the secrets of profiting like clockwork -- with as many investors as I could.

So I've decided to re-open my trading newsletter where I put all of my recommendations into one source you can use to enjoy a very safe, conservative 8% to 10% on each trade.

This way, you don't have to worry about undue risk or losing all of your capital. I can offer you a very reliable and consistent way to bank 8% to 10% on each trade... like clockwork.. so you can slowly and methodically grow your retirement nest egg.

If you'd like a fast, easy, and SAFE way to make money in this crazy market, I suggest you take out a subscription to my service. Following my recommendations is an excellent way to boost your profits safely and easily.

Start by taking a small amount of your cash--say \$5,000 or \$10,000--and begin following my recommendations as they come each day. As you've seen from the examples I've shown... the profits can be quite substantial.

**And based on my track record for 2013--you'd have averaged over 177% gains.**

## Successful Gains that Only 14 years Experience Brings

For me, success in trading is a combination of sound forecasting methods, careful research, timing, well-placed contacts and good old-fashioned market knowledge.

While I thrive on studying charts and using technical analysis to find short term movers, the one thing that gives me my biggest advantage is the fact I tend to focus on a specific kind of stock... those that are oversold.

But not just any oversold stock... there's a lot more to it than that. I use a combination of my 14 years of experience with several little-known, stealth trading tools to find the best of the best oversold stocks that are ready to bounce back and profit in a few days.

We get in when it's time, and we get out quickly when we have good profits. But most of our gains are made in short periods. Designed for traders of any level, this is your key to blockbuster recommendations for one very low price.

And what's truly remarkable is how easy the whole process is. You just...

- (1.) Check your e-mail and review the recommendations.
- (2.) Place the trades
- (2.) Wait for the profits to come.

Once you've signed up, you'll get the daily email newsletter- the heart and soul of the system. I average 10 picks each week and will also give you an additional 6 on a watch list to keep an eye out for. This should help profits materialize right before your eyes in just a few days.

## Members-Only Website Access

You'll also get 'members only' access to the **educational** website where you get the latest recommendations, past recommendations, and trading resources and educational materials.

I don't want to just TELL you what to do, I want to teach you the reasons behind my strategy. In short, you'll get everything you need to start profiting, just as so many subscribers have.

Plus, you get to review my current holdings, new picks, and other trading information you need to be in the know about.

As a member, you could receive as many as 10 lucrative recommendations a week -- each with a chance to return double-digits. But most likely, based on my past 10 year track record...

**You're Looking at 6%, 8%, to 10%.**

There couldn't be an easier way to make money. I provide the **recommendations** for you. All you have to do is watch your account balance grow!

As soon as I uncover the 10 opportunities for the week, I'll send you an e-mail with specific recommendations. From there you can make the trades for the week and wait for the profits

to roll in. Every recommendation could multiply your money quicker than if you were to try finding these trades on your own.

That's really all this is... it's cutting out your trial and error. It's making sure you're not stuck losing out on trades that just never seem to materialize for you. This is about speeding up your own results and success.. and helping you piggy back off my 14 years of experience.

This way, you can enjoy reliable, consistent profits that can add up to a huge nest egg over time. Over the past few years my readers have had the chance to see gains as high as 8%, 10%, 14%, and more.

And that's not to mention recent winning recommendations like... MNKD ... which I bought for \$7.76 and sold a few days later for \$9.51... Booking 22%

## **This trade booked 22% in under two weeks**

You get a daily financial newsletter and educational website that gives you up to 10 picks per week along with a watch list of about 6 additional stocks.

You're getting specific steps and actionable advice provided by an expert swing trader who consistently GETS 8% to 10% returns on each pick within a 6 trading session time span.

Plus, in addition to 10 picks each week and the watch list of 6 addition, you also receive:

- Access to our educational site: a library of stock information at your fingertips. You can read through new recommendations, market analysis, stock updates, and other useful information that can help you make money in today's market.
- Monthly webinars to help you learn all the little-known secrets of swing trading as well as recap the monthly picks and discuss the technical indicators behind the picks.
- Access to a live chat room during trading hours so you can bounce thoughts and share ideas with professional traders.
- Weekly analysis of the overall markets and reaction based on current events and market activity.

You get recommendations from one of Scottrade's leading stock experts - roughly 6 to 10 delivered by e-mail each week.

You'll know precisely what to buy, where to buy it and at what price. You'll learn why I believe the stock is moving higher in a very short time. This is a serious service for traders who are serious about making money.

## **You Could Book 8% to 10% *without doing any work...***

**As you've seen, my picks made in 2013 were up 177% and are currently up 68% thus far in 2014.**

Talk about piece of mind. Not having to sift through charts and tons of reports and technicals. You can grab my picks, make the trades, and enjoy 8% to 10% without breaking a sweat.

It's like getting an expert stock trader doing all the work FOR you. Not to mention, I'm one of

the FEW recommended and endorsed by Scottrade, one of the leading trading brokers.

To put it directly, *this* is one of the safest and fastest ways to boost your profit in today's volatile market. The strategy's sound because it's been proven over the last 10 years. There's a long history of successful, profitable trade picks.

The recommendations are easy to execute and track. And I'll do everything in my power to help you succeed. Of course, I can't guarantee profits. Investing always carries risk and you should assess what your situation is and realize that losses do occur.

## **Just Follow my Instructions...**

If your returns haven't been what you want and haven't been consistent or high enough to make an impact over the long term... you'll need to make a change.

You don't want to wait until you're older and realize your returns never really added up to the kind of nest egg that will provide you and your family with the kind of lifestyle you want.

My 14 years of market experience have enabled my subscribers to consistently grab the kind of opportunities I've told you about so far...opportunities that can take a very small amount of money and grow it into a substantial amount over time.

If you want to see those same kind of results in your portfolio... you have an opportunity to be part of this service and participate in the kinds of consistent gains I've shown you.

I'm talking about regular, consistent gains that are REAL and not B.S. like the 1,000% gains the scam sites will try and sell you on.

Please, you must know that those 1,000% claims are fake. If something sounds too good to be true, it almost always is. But what ISN'T fake is my ability to consistently and reliably return 8% to 10% on each trade... in a matter of a few days.

With my service, I'll tell you everything you need to know--right down to the ticker symbol for the stock I recommend. Then each day, you watch the stock you've bought move in the 'right' direction until it hits my target price--or you're happy with the profits you've made!

What I want to show you is how a track record like mine can impact your wealth. Even if you make JUST 5% a month... that's 60% a year!

## **I've pulled in 177% last year and already at 68% this year**

With a starting capital of just \$10,000 and a ROI of just 5% a month...

1st year: \$16,000  
2nd year: \$25,600  
3rd year: \$40,960  
4th year: \$65,536  
5th year: \$104,858  
6th year: \$167,773

7th year: \$268,437  
8th year: \$429,500  
9th year: \$687,200  
10th year: \$1,099,520

As you can see above... in just 10 years at a conservative ROI of 5% a month, you can turn \$10,000 into ONE MILLION DOLLARS. That's the cash you could accumulate with a pretty average and conservative return:

Incredible, isn't it? That's over a million dollars that you could make over the next years just following a few simple recommendations that bring conservative yet consistent returns.

Again, I think of myself as Mr. Conservative. And I'm not including monthly or daily compounding! But again, it takes a little time... this isn't some get-rich-quick scheme. It's a real method to create a consistent income for as long as you want.

Slow and steady wins the race... or in this case, the million dollar retirement account. And judging from the gains I've made... this has proven to be a valid, consistent trading resource.

By becoming a subscriber to my service, you'll be the first to know about stocks that could make you 8% to 10% profits consistently and reliably. In fact, you'll be able to WIN consistently.

## **It's Like Shooting Fish in a Barrel**

Small, realistic, consistent gains will add up and become a giant nest egg that can set you and your family up for a great life and retirement.

As you become more confident in this system, you can start trading with larger amounts and the money you can make if you keep rolling over your bank roll and trading larger amounts.

Again, we're not trying to 'get rich' here. Just steady, consistent, and reliable returns that add up over time. That's why I don't go for more than 8% to 10%.

This way, it's as sure as anything... since I'm grabbing JUST enough of a return that can make me wealthy over time. If you're looking to make a million bucks over night... this isn't for you.

**Sure, my recommendations and advice CAN make you a millionaire.**

But it AIN'T gonna happen overnight. If you think it will, please don't invest in this because you'll be disappointed when you find it's not "get rich quick".

I can promise you this... this is a proven method that earns a consistent return of 8% to 10% on each trade. Sure, some days I luck out and hit 22% or around there... but not always.

But it IS designed to succeed MOST of the time. And it has for hundreds of other investors, helping them make profits in markets that less experienced investors lost their shirts in.

I've racked up an impressive track record over the last 10 years by identifying high-profit

opportunities in stocks that are likely to return fast and consistent profits.

## **And things are looking good this year, too**

If - as it appears we're going to do - we repeat the profits of last year, you could enjoy 177% returns. Just follow my lead and you'll make enough profit to add up to a giant nest egg and comfortable retirement.

We siphon off 8% to 10% returns every 2 to 6 days because this system is set up to make money for as long as you want.

Look, the key is getting rich SLOWLY by making small gains as often as you want. **I can show you exactly how to make 8% to 10% like I do...quickly and easily.**

To minimize risk and increase the chances of making money... go for small, steady gains consistently. Again, as you become more confident and you have a lot of smaller wins under your belt, you'll be able to trade with larger amounts. THAT'S where the real money happens!

But as good as this all sounds... this isn't some "make millions overnight" scheme or "get rich quick" plan. This is a chance to provide you with a great yearly income for the rest of your life!

## **If Anything, You'll Get Rich Slowly!**

It's a predictable lifelong income if used correctly. By capturing just a small part of the movement on certain stocks, you can make consistent profits every day.

In other words, this allows you to grab small, safe profits with less risk. Making 10% is a safer, quicker and simpler method.

Sure, we can do what a lot of other websites do... which is fraudulently boast of 200% returns... just to get you to part with your money. But the truth is, 200% gains daily is it's not possible!

This service offers a real, proven strategic approach to book consistent gains of 8%,10%, and even the occasional 20% week after week. Those other newsletters telling you they can make you rich in a matter of weeks? They're out to take your money... this is how THEY get rich.

Instead, I offer a unique service where you can learn about the stock market, specifically swing trading while earning money following an expert trader. It's a realistic and verified service proven to deliver real gains on a consistent basis.

## **The Reliable, Dependable, and Profitable Trading System**

**Just solid picks, strong education basis and modest, consistent and realistic returns of 8% to 10% that can add up to a HUGE bank account over time.**

You can earn big profits when you can "forecast" the upward move of an oversold stock.

My job is to find those stocks that are oversold without reason, and time it so we can catch the upward rebound... grabbing fast and easy profits when it does indeed bounce back up.

And the right ones DO... it's all about patterns and cycles. I've learned, through years of experience, how to spot certain stocks that have been oversold and they are ripe to reverse that trend and bounce back... putting quick profits in our pockets.

Researching stock market cycles is one of the ways I've made my readers great profits year after year. The bottom line is that I think you'll find that I've created the...

## **Easiest Way to Make Money all Year Long**

I say easy because all you have to do is take a look at what I recommend. Then you make the trades.

That's it! I've done all the tedious research to find and validate these so that you don't. You'll also find that every recommendation is all about QUICK profits.

That's because the stocks I trade are the opposite of "Buy & Hold". They're "In & Out" opportunities. You'll buy and then sell them in days or weeks at the most.

In other words, I've designed it for fast results. Any time stocks move so quickly one way, there are bound to be mini corrections the other, be it profit taking or just the realization that the stock's been oversold.

## **The Key to Making Consistent and Reliable Profits....**

**Using my system, we pick the stock that will move up the farthest in the shortest amount of time. And the farther the move ... the more money you make.**

It's that simple. In this market, even some of the biggest companies swing wildly up... down... and back again... sometimes several times in a single *day* of trading.

My technique selects stocks that are primed for a "pop" back up from their oversold position. I'll find the stocks whose price has moved too far in one direction - like an overstretched rubber band - and primed for that "rubber band" to snap back the next morning.

Since they're oversold, they've gone too far down... and the "snap-back" of this rubber band effect is simply a correction. And stocks like these almost always have a correction in days.

In 14 years of technical analysis, I've found that the most profitable correction we're looking for - the rubber band snapping back - happens within the first few days of a stock that's oversold. This overselling of that stock triggers our set-up.

The stock is overbought and we're going to time its "snap back" correction. We will be there to catch it when it pops back into place.

## **Locking in Gains of 8%, 10%, even 12% in Days**

I'll scan the market for stocks registering a bullish momentum, which means a stock is significantly OVERSOLD and ready to rise. Stocks that have been oversold and crushed well below any reasonable valuation are perfect examples of buying opportunities.

While some may call this vulture investing, I just call it smart. So if you've been losing money in the market, I'd like to invite you to join me as we make these same profits going forward.

**There's never been a better time to profit from swing trading.** Because this is a volatile market. Up one day. Down the next. It's a swing trader's dream -- and the opportunity is huge.

I'm not looking for balance sheet fundamentals. I'm looking for "reactive" opportunities -- driven by raw emotion and "herd mentality." Any stock these days can be hammered down— or driven skyward--simply on a turn in the mood of the market. And that's precisely the environment my system works the best.

**For** instance, this is exactly what we did between in the week. AKS was bought at \$6.42 and sold a few days later for \$7.60... Booking 16%

## **Effortless Moneymaking Opportunities Abound!**

The beauty of using a method that's been tested and proven over time, is it will be there for you like clockwork.

Imagine knowing, every morning when you wake up, which stocks you'll want to own that day.

All spelled out in an easy to understand, step-by-step format designed for fast trading. This takes away trial and error and guesswork... giving you a consistent and reliable way to profit from the markets, without needing to do any of the hard work yourself.

Few investors know about this safe way for you to make substantially bigger gains in the stock market - while putting a lot less of your money at risk.

Years ago, investing in stocks was about buying a good company, settling in for the long term, prospering when the company prospered, and earning dividends as they came. These days, the market is much more volatile and less predictable.

Stock prices today are much less about the company's earnings and fundamentals than prevailing investment trends or the "mood" of the market. The more volatile the market, the faster and bigger your returns.

With my service, I'll show you immediately which stocks will make the moves that allow us to get in and get out fast... banking quick and easy returns of 8% to 10% or more. Once it bounces back from the oversold position, we'll be there to cash out at the predetermined target price... locking in sensible gains.

**Again, slow and steady wins the million dollar PLUS retirement account.**

I'll promise you that as a subscriber, you'll look forward to Monday mornings like you never

have before. Imagine checking your e-mail before the market week opens...seeing the recommendation for the weeks...placing the recommended trades...and sitting back.

I can't imagine a faster, safer way for you to sock away winning trade after another.

## **Proven to Put the Odds For Profits In Your Favor**

In any market, the only way to really make money is to zoom in on one proven method that works... a method that has produced consistent, reliable returns for 10 years now.

Follow my newsletter service and you'll find the best opportunities to grab nice, steady gains. Every time. That's what my service is designed to help you do.

Think ahead a few years from now, just using the profits you make with my service.

You could be driving a new car and not have to worry about monthly car payments because you paid cash. Take that vacation or cruise you've always dreamed of. Put a pool in the backyard and dive in! Pay for your child's college education in full. Buy an exciting new vacation home. Go out to four-star restaurants as often as you want.

You'll sleep better at night, with greater peace of mind. And you'll be on your way to financial independence.

## **Join Other Traders who are trading their way to wealth**

There couldn't be a better time than now to start. Between the topsy-turvy market -- and the low-yields on CDs and savings accounts -- it's a relief to know there IS a way to make the kind of money you've always hoped for...

I've been subscribing to John's newsletter for a few months now. I've learned a lot about the stock market since I been following him. While nothing is 100%, I can honestly say that the picks he recommends in his newsletter has profitable 80% of the time. Mostly because of the system he has developed. The goal is to bank 8-10% profit on whatever stock you buy. I did not start with a huge capitol, I started with \$2000. With John's help I have made \$924 so far. I am a beginner so I have a long way to go before I am successful as he is. The stock market is not easy. Even with John's help you have to study and put in the work yourself to be successful. Success varies for every person but I am glad to have someone to follow as I continue to learn the market. Myron Barnes – Philadelphia, PA

"I followed John for a few months before subscribing to make sure he was legitimate. He posts pictures of when he buys and when he sells his positions in his portfolio and he was consistently making 5, 10, even 15 to 20% on trades. My first trade I made got me 20% profit and I sold. It eventually went up 40% which would have been great but I was more then ecstatic with my 20%. I bought stock in a few companies that lost money right away but by being patient I got my loses back and even made profits on some. I've only taken a couple loses and a great amount of profits. Another great thing about John's service is he will respond to you either via email or over instagram for when you need help or have a question that the newsletter didn't cover. All together this is a great service and easily worth the 50\$ a month to make the same plays as John!!" Patrick Timmons- San Diego, CA

## **Seeing Gains of 10%... 20%... Couldn't Be Any Easier...**

The good news is, I've reserved a spot for you. By next week you can be making consistent profits. After more than 14 years of experience as an investor, financial analyst, and now editor of my financial newsletter, I've helped hundreds of my subscribers **make money**.

Since starting my newsletter, my average return per trade has been 8% to **10%**... and some going as high as 22%. Either way, you'll never find a faster or easier way to walk away with **10%** average returns per trade without doing any of the research yourself.

## **A Very Limited and Time-Sensitive Opportunity**

What do you think it's worth to have information like this coming to you each week...to be on the receiving end of recommendations that can turn a minimal amount of capital into thousands of dollars in profits time after time?

Serious traders who appreciate the value of carefully researched, consistently profitable advice know its worth a great deal. To get started, all you need to do is let me know and you're in.

But I urge you to act now, because at the price I'm offering, the spots will fill up fast. Because this may be new to you, I'm offering an introductory trial price of \$50 each month, which is \$50 off the regular price of \$100 it will be each month.

As so many of our subscribers have told us--it's worth every penny and more. Most subscribers we talk to say they made their subscription back and more on their first trade!

You'll get my consistently profitable recommendations delivered to you by e-mail. The recommendations you'll get are short and to the point. I'll tell you the opportunity, why I think it'll be a winner, the stock symbol, entry and exit, and the kind of profit I'm gunning for.

The steps are so clear, even the newest trader can understand it. Just follow the advice.

### **Just \$1.66 a day Buys 365 Days of Profit Opportunities**

The introductory price for this service is just \$1.66 a day, or \$50 for each month. Imagine locking in gains of 10%, even 20% year round for just \$1.66 a day.

Take the change from your pocket. Lay out a \$1.66. What can you buy with \$1.66 these days? Not much, right? That's less than it costs, in most places, to get a small cup of coffee. And there's no way coffee will make you money like this will.

That's why I hope you'll see this as an investment because I'm going to help you get money in YOUR pocket as quickly as possible. How much money can you turn that \$1.66 into when you're enjoying gains of 8%, or even 20%.

You can follow my proven track record for consistent returns and soak up the same great knowledge for a low price of \$50 per month... which by the way is MUCH less expensive than similar products that don't have nearly the same track record.

**And ask them if they are Scottrade approved and recommended!**

My guess is, they are not. And with my service, you get a daily newsletter with nearly a dozen picks a week to choose from. And it's far less than what many advisory services charge that can't touch the success I've had making recommendations.

The way I see it, the subscription is a LOT less than the profits you could see on one trade.

## **The Best \$50 Ever Spent...**

I know your time is valuable. So with my service, I'll never mess around with stuff you don't need to know. My goal is to help you with your trades and immediate opportunities.

I'll tell you what the opportunity is, what it means against the big picture and what to do. Just like that. Only the things you need to know and do to easily profit from swing trading.

You'll get all the details on my current recommendations. Simply click **Subscribe Now** at the bottom. I'll be sure to get you started on your profitable journey right away by rushing you the recommendations I believe will earn you 8% to 10% (or more) in the coming days.

## **Check Out the System on a 7-Day Trial Basis**

I know I've made a lot of promises in this letter. But I don't expect you take my word for any of it. That's why I'm going to put all the risk squarely on my shoulders, where it belongs.

I'll let you take 7 days to decide if **this** is for you. If after the first 7 days you don't like what you see, I'll make sure that you get a full refund of every cent paid. No questions asked. No one will quiz you as to why you want out. If *this* isn't for you, why make things difficult?

When you receive my recommendations, make paper trades for the first few days until you feel ready to take the next step. Then make a few actual trades. And then decide for yourself if it's right for you.

This gives you a free chance to participate in all of my recommendations. If you don't agree that it's the most profitable investment information you've ever seen... if you don't generate returns of 8%, 10%, and higher... you get a refund- no questions asked.

I'm willing to make you this free 7-day offer because I'm so confident that, like many nervous and skeptical subscribers before you, you'll quickly see just how much money you can make in a short period of time.

If you're ready to get started, I really want to offer this service to you at a super-attractive price...and virtually risk-free. I hope you'll see that and take me up on the offer.

Simply click the "Subscribe Now" button below to enroll immediately and guarantee your spot on our roster. You'll have full access to the recommendations, educational and training site.

After you're 100% satisfied and confident of the money this service will make you, we'll automatically bill your credit card \$50 each month until you tell us to stop. I don't normally

make this introductory price available, but I'm offering you this special because I don't want a few dollars to come between you and the wonderful opportunity my service offers.

## **Get in on the Introductory Rate and Save \$50 Per Month**

If you'd like to make reliable, consistent profits while dramatically limiting your risk so you can sleep well at night... If you'd like to discover how I gain reliable and consistent returns of 8% to 10% on each trade... allowing me to turn \$25,000 into \$800,000... join **now**.

**Are you in?** If you're ready to get started, here's what you need to do right now...to get started today, simply click the "Subscribe Now" button below to guarantee your spot.

Right now, I'm accepting new subscribers on a first come, first-serve basis. You can subscribe RISK-FREE today by clicking the 'Subscribe Now' button below.

I've got a nice profitable thing going here. The gains can be consistently and reliably in the 8% to 10% range or more. And I see no reason why they won't keep rolling in. This is your opportunity to hop on board and get a piece of some pretty good profits.

Please don't miss out. How many investment advisory services can say they've provided their subscribers with the opportunity to earn 8% to 10% each and every trade, like clockwork! Join today and given my track record, your first gains should be in your pockets in short order.

Make a modest, intelligent investment on your future wealth. Subscribe to the service today.

### **ORDER BUTTON**

Sincerely,  
John Guzman

**P.S.** As a subscriber, you just don't profit from my stock picks, you get to learn trading inside and out with our complete educational training website to teach you the tricks of the trade. This way, you can learn the ropes while you profit without doing any of the hard work.

So don't delay. Subscribe today, and become a more profitable trader in a lot less time! Picking winning stocks has never been easier. Using my advice and recommendations, I'll tell you with accuracy which trades are set to make you big profits...

**P.P.S.** Forget about making 5% to 10% a year -- how about 8% to 10% each and every trade and 177% a year like I did last year and 68% like I've done so far.

Remember, this offer will be \$100 after the introductory period. If you have any interest in significantly increasing your returns and profits from the market... here's the fastest and easiest way to do it. You've got a 7-day money-back guarantee to try it out while saving \$50 per month. So, go ahead and give it a try now... it's in your own best interests...
