

*Trading options can sound complicated.... but right below, I simplify options trading for you... so you have a better chance of trading profitably...*

**“Give me 20 Minutes and I'll Show You How I Made \$2 Million Dollars Trading... Lost \$350,000... and then Made it All Back Again... and More... Following Some Simple, Proven Rules for Options Trading!”**

**Many traders and investors want to grab some of the benefits and profits that options trading could provide... but they're just not sure what options are, how to trade them, and how to make sure you reduce your risk.**

**So in the article below... you'll learn all about these investments known as options...**

Dear friend,

If you're a trader or investor... there's a good chance you still won't go near options with a 10 foot pole. Why is that? Well, for the same reason I never did.

I didn't understand options and thought they were just too difficult to trade... and were only something the big Wall Street experts traded.

Boy, was I wrong. In fact, not only did options make me wealthy... I managed to simplify the entire process so much, it's what I do know for other traders around the world.

I make the entire process of trading options a lot easier to understand and follow.

Because of that... there's more of a chance to profit with them.

Most traders and investors do not know about the potential profitability of options... so instead of learning about them... they don't even bother.

Well, if you give me 4 minutes of your time... I'm going to show you how I've been able to use options to make more money than any other investment.

Look, let me just say right now... that options can be made simple to understand and easy to learn how to trade with.

An option is nothing more than a contract that gives you the right, but not the obligation, to buy or sell an asset at a specific price on or before a certain date.

An option is just like any other stock or bond, like Google, Apple, or Coca-Cola. When you buy an option, you have a right but not an obligation to do something.

You can always let the expiration date go by, at which point the option becomes worthless. If this happens, you lose 100% of your investment, which is the money you used to pay for the option. Second, an option is merely a contract that deals with an underlying asset.

There are two main reasons why an investor would use options: to speculate and to hedge.

Speculation is the territory in which the big money is made - and lost.

The use of options in this manner is the reason options have the reputation of being risky. This is because when you buy an option, you have to be correct in determining not only the direction of the stock's movement, but also the magnitude and the timing of this movement.

To succeed, you must correctly predict whether a stock will go up or down, and you have to be right about how much the price will change as well as the time frame it will take for all this to happen. The options market goes hand in hand with the futures markets. When used properly, options give you an opportunity to diversify your holdings beyond traditional investments and to hedge your portfolio against risk. The key is discovering how to use options the right way.

Here's some basic information about options:

- **Option buyers are also known as *holders*, and option sellers are known as *writers*.** *Call* options give the owner the right, not the obligation, to buy an underlying asset at a specified price within a specified time frame. *Put* options give the owner the right, not the obligation, to sell an underlying asset at a specified price with a specified time frame. Call and put holders can exercise these rights at the *strike price*, the predetermined price at which an option will be delivered when it is exercised.

Call option writers (sellers) have the potential obligation to sell. Put option writers (sellers) have the potential obligation to buy the underlying asset.

- **Options, like futures contracts, have expiration dates.** All stock options expire on the third Friday of the month. Options on futures expire on different days depending on the contract. Sometimes different classes of options expire on the same day. These days are known as double-, triple-, and quadruple-witching days:

- **Double-witching days:** When any two of the different classes of options (stock, stock index options, and stock index futures options) expire.

- **Triple-witching days:** When all three classes expire simultaneously, which happens on the third Friday at the end of a quarter.

- **Quadruple-witching days:** When all three classes of options expire along with single stock futures options.

- **Options trade during the trading hours of the underlying asset.**

- **Owning an option doesn't give the holder any share of the underlying security.** The

right to buy or sell that security is what options are all about.

•**Options are a (slightly less than) zero-sum game.** For every dollar someone makes, someone loses a dollar. Options, like futures, have both a seller and a buyer. When you make a losing trade, someone else gets an amount equal to your losses transferred to his or her account, and you get charged commission. The exchanges also get a fee.

•**If you win, you'll probably owe taxes.** The treatment of options in the tax code is complex, and much of it deals with whether you have short-term or long-term gains. The details are provided in the option disclosure statement, which is required reading before you ever trade options. The statement is part of the packet of information your broker gives you along with the account application. Be sure to read that document carefully and discuss the tax-related details with your accountant before trading.

options give you the *right* to buy or sell an underlying security or asset without being obligated to do so, as long as you follow the rules of the options contract.

Now that you know the basics of options, here is an example of how they work. We'll use Coca Cola as an example.

Let's say that on May 1, the stock price of Coke is \$67 and the premium (cost) is \$3.15 for a July 70 Call, which indicates that the expiration is the third Friday of July and the strike price is \$70. The total price of the contract is  $\$3.15 \times 100 = \$315$ .

In reality, you'd also have to take commissions into account, but we'll ignore them for this example.

\$3.15 per share, the break-even price would be \$73.15.

Exercising Versus Trading-Out

k to close. According to the CBOE, about 10% of options are exercised, 60% are traded out, and 30% expire worthless.

Intrinsic Value and Time Value

Look, I started out in the world of finance when I was 23. I was bored to death with my regular 9 to 5 job. I just felt like I was missing something more... like I was meant to have more, be more, and do more.

I just had no idea what that was. So, I ditched my corporate job and took my complete life savings and went to a firm where I could enjoy the freedom and potential profitability of trading stocks, bonds, and other securities.

It was there I fell in love with options. After a short time at this firm, I quickly realized that trading options were more profitable than other equities.

He started his career as a Financial Analyst; a career he soon felt unsuited for. So he decided to take the plunge into the markets and come up with a way to avoid the 9-5 lifestyle.

He traded two years at a proprietary trading firm, all the while learning what strategy suited him best, and then went out on his own managing money for himself and his family. After much success in 2009, he took a much needed break.

After two years of grueling trial and error, I became a self-made millionaire by 25.

Because of all the information I learned over those 2 years of hard work, sweat, and trial and error, I quickly realized that I could take the complicated parts of options trading... and simplify it all so that anyone could use options to potentially make a lot of money.

So, I started my blog with the mission of helping traders simplify the overly complicated world of options. But not long after, I was dealt a massive blow that almost knocked him out: a \$300,000 loss.

What happened? I simply got too cocky and started ignoring my own simple rules of options trading. It was then that I quickly learned that if you forget what works... and go too far away from the simple, proven rules... you can lose a lot of money.

And sure enough, I did... to the tune of \$300,000.

While so many people get discouraged because they have no idea what options are, how they work, and how you can make money with them... it was then I realized that I could help so many other people out.

How? Simple... by making options easy to understand. I could simplify the entire process. These days, I make option trades based on the methods I've learned over the years of trial and error.

Our proven strategies have netted \$1.4 million this year alone.

Anyone can learn how to trade options.... it can be broken down into a simple, step by step process.

Couple that with the fact that you can get a huge return on the capital you put at risk, and it becomes obvious that options give you the biggest bang for your buck.

high profitability options trades. His strategy combines market-timing and simple options plays to capitalize on short-term moves. These short-term moves could be anywhere from a couple of seconds to a couple of a months.

familiar with the stock market but has never traded in this capacity or with this unique strategy. Every trading day, Sang Lucci tells him what option to buy, when to buy it, and when to sell it.

help others learn how to succeed in the game as well.

Options trader Anand Sanghvi took such a path. Only 30 years old, Sanghvi's highs include ballooning his father's retirement fund to over \$2 million, and his lows at the trading table have showed him what it's like to lose \$350,000 in 20 minutes.

Bouncing back, his firm – a small group of friends that live together in a Manhattan apartment and operate under the collective name Sang Lucci – is closing year two of a hedge fund adventure in which an initial \$400,000 has grown to almost \$2 million.

All the while Sanghvi has taken on students – disciples, if you will – that pay to learn what he knows about making money fast by trading options on blue chip stocks.

Always interested in finance, he took a position as an analyst and staff accountant at Fresenius Medical Care . “I was miserable because I was going in every day, looking at the same spreadsheet and hating it one hundred percent.”

In 2006 Sanghvi's dissatisfaction led to his resignation, but he soon found a commission-based trading position with PTG Capital. Toiling for over a year, the nuances of trading began to sink in and he started making money consistently. By the 2008 crash, Sanghvi was named top trader using the short as his tool. “In the crash you could push a button and short something and make money in seconds—it was just panic every single second.” After the market bottomed, PTG began investing long on financial institution. When the banks fell, so did the firm. With his leverage capped, Sanghvi left in early 2009.

## Going Solo

Taking his savings – as well as his father's retirement nest egg – he set out on his own solo trading adventure. Picking up cheap stocks like Las Vegas Sands LVS +0.87%, Bank of America BAC 0%, Citigroup and others – also playing some options – he grew their portfolio value to over \$2 million.

Jubilation turned to dismay, however, when Sanghvi lost over \$350,000 investing in SPY fund. “It was just bad timing,” says Sanghvi. “I was super cocky at that point because I had made all this money.” The shock of the loss marked the beginning of period of introspection. “It just broke me mentally,” he says. “When you're sitting there looking at the screen on a loss, you're losing the kind of money that people never really see on a daily basis, or even a yearly basis or even in their whole lives.”

What followed was a year of market inactivity for Sanghvi. He traveled, spent time with his

daughter Avani and contemplated his next move. To hear him speak about that time, one wonders whether he's ever been able to shake the trauma of losing a sizeable chunk of a hard-earned portfolio in less time than it takes to watch a single episode of a sitcom. One also wonders if that impact was a priceless lesson that's made him better.

## A Return to the Market

Taking his lumps, Sanghvi returned to trading in late 2010 with a perhaps more grown-up decision to cultivate a side business. He started a blog focusing on the market, his moves and debunking what he felt was misinformation in financial news. Calling his site SangLucci.com ("Sang" taken from his last name and "Lucci" a hip-hop reference for money) he wrote four articles every day, hosted a free chatroom and held one-on-one Skype sessions (\$89 for four sessions) from his office in Boston. As his understanding of social media grew, so did his following, and Sanghvi raised prices on his information products high enough to cover all of his basic expenses.

With a renewed focus, Sanghvi found a kindred spirit in Peter Zhang, whom he met at a Las Vegas conference in early 2011. At the time, Zhang – now head of risk management at Sang Lucci – suggested over sake bombs at The Venetian hotel that the two could start their own hedge fund. Sanghvi wasn't sold.

Today the fund stands at just under \$2 million in assets, up from an initial \$400,000 raised in February 2012 from 11 investors, including \$100,000 from Sanghvi himself. "This year our last numbers were up over 400%," says Bathgate. "But I would say that with a strong disclaimer that every investor in our fund knows it's a very high-risk, high reward proposition."

Sanghvi admits that investing someone else's money initially made him trade more defensively. After seeing some losses due to his trepidation, he nipped that tendency in the bud. "Look, I know what I'm doing—this is what I do," he says.

The firm's website services have also grown. Charging \$250 for yearlong membership or \$83 for three months, the site has attracted about 300 subscribers at recent count. The modern trader has evolved to be more accepting of an educational service like Sanghvi's site. "They now expect to pay somebody to help them start in the game," he says. The axiom "those who can do, and those who cannot, teach," may not be applicable here. Sang Lucci's modus is to take screenshots of its moves and results at the end of each trading day and post them on their Twitter feed, regardless of whether they won big or lost.

"Right now (Sanghvi) has over 7,000 followers on Twitter," said Bathgate. "If he posts a big loss, there are all kinds of people that come out of the woodwork and say, 'You're an idiot for doing that.'" Criticisms aside, that kind of transparency is essential for convincing newbie investors that the service, and traders behind it, are for real. "This is the cost of what we committed to and it's worth it."

The high frequency options game, though risky, allows Sanghvi to make fast headway in his portfolio. He finds that young investors fresh out of college are not equipped to fully understand that strategy. "I remember one professor told his students that what I was doing was not possible," Sanghvi says. Investment curriculum needs to be updated in order to ready finance students for modern trading realities, he added.

the only thing they want to do is **GIVE back and help out those looking to make money trading.**

That would be me. No, I'm not some Wall Street shark looking to take your hard-earned cash. Quite the opposite... I'm looking to help you make MORE profits and bigger gains from trading... *so you can change your life and your family's life.*

What is my main motivation you might ask? Simple, I had made a lot of money in options... but let my own confidence and cockiness get in the way of the proven methods I had learned and used to make the money... and ended up losing

I soon found that the big wigs on Wall Street... the fat-cat rich CEOs who are running the big banks and brokerages houses... they're not interested in you helping you or any other regular, average Joe.

**They're interested in one thing and one thing only:** squeezing every bit of profit and money out of regular traders... so that it goes to their bottom line.

Well, that's not who I was, it wasn't how I was raised, and I didn't feel comfortable trying to squeeze every penny out of regular, average folks who were looking for guidance and help.

This was their life savings and retirement money they were trusting me with. I didn't have it within me to swindle and trick them into putting all of their money into assets that would make ME and my company the most money. So, needless to say I broke free of these big investment banks and trading firms and decided I'd do things a bit differently.

## **I'd Manage my Own Fund and Portfolio...**

But like I said... I'd do it different than other Wall Street corporate fat cats. Instead of trying to make the most profit and commissions from you... I'd teach you and other traders how to trade and make more money from the market.. so you could provide your family with the kind of life you wanted to give them.

Sure, being a successful trader is great. The money I enjoy and lifestyle I live... it's second to none. But after a while, it feels empty.

Again, I just feel I was put here on Earth to help other people. So once I started making a lot of money... I knew it was in my future to help others learn how to trade and make money too.

I decided on options because I felt it would be my easiest path to riches... and I knew I could help other traders figure out this mystery called options that so many people shy away from.

And to say I've had some success would be an understatement. At just 30 years of age, I managed to turn my father's retirement fund...

**Into More than \$2 Million Dollars!**

But I've also had my fair share of lows, too and THOSE motivate me even more to help other people avoid the same mistakes I've made.

**I do NOT want you to know what it feels like to lose \$350,000 like I did.** If I can do anything in my power to help you avoid that, I will. Thankfully, that huge set back and loss of more than a quarter million dollars didn't crush me to the point of no return.

It actually made me come back harder and stronger... with even more motivation to figure options trading out for myself and for my students who want to learn the truth.

Sure, after losing \$350,000... it would have been pretty easy to throw in the towel and quit. But my father taught me at a very young age that quitting just wasn't in our DNA.

My parents immigrated from India to the United States when I was a child. My father worked 4 jobs just to be able to provide for our family as well as family back home.

So, needless to say, I was raised with the same work ethic. But I knew from an early age that I had to do something different. I saw how hard my dad worked at 3 to 4 different jobs...

## **Yet we were Barely Making Ends Meet**

I didn't want that for myself. I saw how miserable he was working so hard, for so little.

Instead of working 3 and 4 jobs, working my hands to the bone just to barely survive, I decided I was going to find an easier way to make a lot more money.

Once you see where I started from... how I had to scratch and claw my way to success... you'll realize that you can do anything you want to do too... and that includes learning how to trade options and make a LOT of money.

There are FAR too many hard-working folks who spend years working for bosses who don't appreciate them. And or what... just to earn low pay that barely covers their bills? I'm going to show you a better way... a way to live life on YOUR terms. A way to have all the money you need and enjoy all the free time you want.

But then, something life-changing happened and I wasn't really prepared for it. I had a child at the age of 21. Well, needless to say when you're 21, you don't haven't exactly conquered the world yet and make your way.

So, knowing I was going to be a father... that motivated me to be the best provider I could be. I wanted more money... because I refused to live like my Dad did... working 4 jobs and barely making ends meet.

I was determined to find a way to provide for my family, but do it in an easier way so that I was also there for them. I remember almost never seeing my Dad while I was growing up, and that bothered me.

I swore that once I had my child, I would not only do my best to provide for him or her, but that I'd also be there to cherish every step and every moment. Soon enough, I discovered the ultimate mountain of money in the U.S.

## **The Stock Market...**

My degree in college was Finance and I had the stock market in my head as something that sounded pretty cool.

Since I was in school and taking classes for finance, I took a position as an analyst and staff accountant at Fresenius Medical Care .

But there was just one problem. I was miserable because I was doing the same thing, over and over again, every single day. The monotony of the job made me HATE it... to the point where I'd dread going in. The thought of doing the same thing, over and over again, like a hamster on a wheel drove me crazy.

So I quit and was able to find a commission-based trading position with PTG Capital. I met guys in the office making \$10-\$20,000 a month like clockwork. That's when I realized the true potential of trading... how there was no limit on how much money I could make.

After about a year of learning everything I could about trading, I started seeing some pretty good cash come in. In fact, I got so good at my job I was named top trader at my firm.

**Finally, I figured it out and started having \$30,000 months.**

Once you start making that kind of money, your life changes drastically. I got greedy and started straying away from the proven principles that had been working for me.

Because of that... my income varied from month to month. I had months where I made \$60K, and then \$30K LOSING months.

## **Then the 2008 Economic Collapse Happened...**

But the amazing thing is, when everyone else around me was losing their shirts... **I was actually making more money than I ever had.**

That's because I was shorting stocks left and right... knowing that the crash was going to send stocks tumbling down. It was so easy to make money during this economic collapse... ***simply by shorting stocks as they continued to fall.***

The only problem was, my methods soon were discouraged by the bosses at my firm. I wasn't going to make the money I wanted to at this office. They had me on restrictions that wouldn't allow me to take the risk I wanted to.

Realizing that no matter how good I got... I was always going to be held back by whatever company I was working for. Knowing that I had the skills to trade anywhere and make money...

## **I took a leap of faith and decided to go solo**

I was so confident, in fact, I talked to my father, showed him my track record of earning amazing profits, and got him to agree to something I never thought he would: He was going to give me his life savings... his entire retirement nest egg, to trade with. He was willing to do that because his traditional, old-fashioned way of saving and investing nearly left him penniless.

See, after saving for 15 years... he built a substantial amount that grew well from the stock market booms. But once the market crashed... **he lost a LOT of the money he made.**

And here he was, only 6 years before retirement age... he had a fraction of what USED to be in his retirement account. Since he was so angry that the system failed him at what he THOUGHT was safe wasn't...

## **He decided to give me a chance...**

Sure, part of me was nervous... knowing that I had my Dad's financial future in my hands. But again, I was confident with my skills and abilities because I had done it for years... making money in any kind of market.

So, using my Dad's retirement nest egg as my starting capital, I started my solo trading career. I was going to stick with what had worked so well for me up to this point: Options.

I started buying cheap stocks like Las Vegas Sands, Bank of America, Citigroup and others where I just knew I could find value and buy them at amazing prices.

Citigroup was trading under \$3 and when I knew the time was right, I put a quarter million on the \$4 front month call. I think I had about 3 weeks until expiration and my cost was about \$.04. I had about 62,000 contracts.

Sure enough though, the thing took off and the option went up to \$.40. I sold all the way up from \$.20-\$.39 and we made a killing...

## **Approximately \$1,400,000 in a month**

Now, here I was at just 25 years old. **And I made over A MILLION DOLLARS in a single month.**

The thing is, I did this with my very own trading strategy I learned... one that came to me through trial and error and spending thousands of hours practicing and trading.

And like I said, the faith my father taught me to have, and tenacity to never quit would **soon help me turn his initial \$400,000 retirement fund into \$2 million dollars.**

Sure enough, following the same exact methods of trading options I had used in the previous few years to do well...

## **I Managed to grow my portfolio to over \$2 million!**

You wouldn't believe the look on my father's face when I told him I made him a million dollars.

I was just happy he was able to get back his retirement money that he lost from the traditional way of investing that was supposed to work FOR you... not take all your money.

The thought of my Dad enjoying a happy retirement because of my trading system... it felt good. After I gave my dad his money, I wanted more.

So the next month I kept after it, and soon was a seven figure trader. But then, I got cocky and my confidence led me to do things that I normally wouldn't do. That's right... GREED set in and I strayed away from the proven trading techniques I had learned and used over the years to make that \$2 million dollars.

I thought I was invincible. I was wrong. **I soon watched \$350,000 disappear into thin air.** I quickly found out again, that if you stray too far from what has worked for you all this time, you can get crushed quickly.

I soon found out that hogs get slaughtered at the market. I lost sight of what had brought me so much success, and paid the price by losing \$350,000 in just a few hours!

## **I've never felt pain like that in my life**

How could I have lost that much money? Again, instead of sticking with the tried and true principles that always worked... I ventured into something different and invested in a fund.

I was cocky at that point because I had made all this money. But losing \$350,000 can quickly knock you down a few pegs and shake the cockiness right out of you.

Losing this much money CRUSHED me emotionally. The worst part was, I knew better. I knew what it took to make money and KEEP money. But instead, I decided to stray and try things that I didn't know as well.

**And it caused me to lose over a QUARTER MILLION DOLLARS.** I lost, in a few days, what many people will never see in their lifetimes. I felt so broken and beaten down emotionally.

**I left trading altogether to try and "find myself". And the time away was great because I was able to relax, spend time with my family, and just enjoy life.**

The time away from trading made me realize I didn't want to repeat my past failings or go through all that stress again.

It's very hard to forget the kind of shock and trauma that losing \$350,000 can do to you. And it wasn't like it was just make believe money or money I didn't work for.

Part of this huge amount was my Dad's retirement money that I had grown to \$2 million dollars. So, to lose it made me feel like I had failed my Dad as well as myself and my family.

## **But here's the amazing part...**

I soon realized that I followed a certain system, certain steps to make that \$2 million dollars. But, that I also didn't follow that same system... and because of it, lost \$350,000.

Well, when losing that much money could stop anyone from trading again... I actually soon found myself motivated by the fact that if I had made that much money... there was no reason I couldn't do it again. **Or make even more.**

I just had to stay disciplined and not stray away from the simple, proven trading techniques and tactics I had used to grow that money to \$2 million.

So, instead of feeling sorry for myself one more day, I decided to make it my personal goal and mission to not only return to the market, but do better than I ever had before.

I kept my Dad in my thoughts, and my daughter and my family on my mind... as reminders to never stray from what worked. I used them as motivation to want to not only succeed, but make more money in the market than I ever made before.

More importantly, I had my family to care for, including my daughter. I wasn't done with trading. So, I returned to trading in 2010 with a new found passion and desire to trade profitably and successfully.

## **But this time, I had another motive as well**

I wanted to teach others how to do it as well, how to trade and make money by following simple, proven, time tested tactics that worked. I knew that if I could help just one person avoid losing money like I did, it would be worth it.

So, I started publishing my blog and filled it with all the specific advice, steps, and directions I thought would help other traders to skip the mistakes and trial and error... and instead, profit faster and easier from their trading. I also kept a written journal that detailed each step I used to trade, and what moves I made that were the most profitable.

Each and every day, I'd post new financial tips and advice on my website, so others could use it to prosper. But I also kept my own written journal that had my best insider tips and shortcuts that I had learned, and continued to learn.

Before I knew it, I was getting emails from so many people who said they felt inspired by my writings and felt a connection with me and my story.

They said they could sense I was writing from the heart, and wanting to help other people become successful traders like I had become once again.

So, when so many people started writing me emails, asking me for advice, I decided to set offer one-on-one Skype sessions from my office. This way I could help other traders cut out their learning curve and instead, focus on doing a few things right.

It helped keep me sharp and provided another source of income for me so I didn't have to worry as much about trading. And I realized I could actually make a real impact on people's lives. I knew things that could help any trader make better trades and more money.

But the problem was... I soon noticed I was spending more time on Skype coaching, than I was trading and making money for myself. I didn't want to get away from my roots and what made me successful in the first place.

Besides, I still had bills to pay and a family to feed, and trading had always made me more money than any kind of coaching. But I still felt a calling, a passion for helping out other traders who were in need, or not sure how to profit from trading.

I wanted to help other regular people to make better trading decisions so they could make better trades, earn more money, and provide more for their families.

I also wanted to make sure people wouldn't do the same foolish things I did that led me to losing \$350,000... which was stray away from the things that are proven to work. If it's tried and true and it pulls in a profit...

## **Why Change it and do Something else?**

So, in order to still help out as many people as I could, I decided to put all of my tips, techniques, and trading advice into an online course that traders could use to become better, more disciplined and profitable traders in less time.

With a renewed focus and motivation to both trade more successfully and also help more people with THEIR trading, I decided to create the ultimate course in options trading... one that would cover every single thing you'd need in order to profit most from options trading.

I knew it was time to help other traders make money by cutting out all the confusion and BS that holds so many traders back. These days, I help students learn what it really takes to make money fast by trading options. And I'm sure that with a little bit of guidance and simple, step by step direction and advice...

These days, my trading is more successful than ever... running a fund that had almost \$2 million in assets. This year our returns were up over 400%.

That's right.... I made \$2 million, lost \$350,000... and I'm back up to \$2 million dollars again by following what got me there in the first place. I know what I'm doing... this is what I do... so I feel it's my calling to help others trade better and make more money.

To me, teaching isn't about making money... it's about helping fellow humans to improve their lives and their finances, so they can enjoy life more, provide more for their families, and just be happier.

After all, having money and making more profits from trading just opens up your world a bit, to new possibilities and opportunities. You can have and make better choices, and you have

more freedom when you have more money.

So to me, teaching is about improving other traders' lives... and in the process, fills my heart with gratitude. I learned that my mission in life would be to help regular, average, fellow traders make the most money and profits from trading.

I even remember whispering to myself years ago, after I lost that \$350,000... saying "Man, if you ever get the chance to help others avoid this kind of crushing loss... and do it honestly and with integrity... you need to do it.

## **This is the fulfillment of the promise I made to myself**

After working on Wall Street for so long, and then testing, tracking, and tweaking my own results... I was able to create a simple, proven way of making a lot of money with options.

I've since used this proven system to trade with such accuracy and profitability... I knew it was time to let others get in on this amazingly profitable information.

My trading system has given me an edge and unfair advantage for trading options profitably, I know feel its up to me to give you this same advantage.

Using the same trading techniques and methods I've used to grow my account to over \$2 million dollars... you can be sure you have a REAL way to make money in options. This isn't some "pie in the sky" scheme to separate you from your money.

This is the same system which helped me amass a \$2 MILLION DOLLAR fortune... so you can be sure it will work for you as well.

Look, I've been in the trading field for 10 years and I've spent years studying, researching, and learning all things options. You can piggy back off my years of trading experience.

Clearly, the fastest way to make money trading options is to learn from a trader who is already doing it. That way, there's no guess-work at all.

## **Fortunes are Being with Options**

I can tell you as sure as anything... after years and years of being in the financial trenches... is that the **BIG MONEY is made in options trading**. And the thing is, I **HONESTLY** feel that anyone who learns the inside secrets to trading options can enjoy **tens of thousands of dollars** in profits, each and every month.

Look, options is one of the fastest and easiest ways to make money from the markets. And there's absolutely no reason why you shouldn't be using them to make a lot of money.

Over the course of time, I learned how to take trading options to the next level. And that's when I realized how anyone could use my advice and instructions to enjoy similar results.

After all, I was amazed that more people didn't know about options. Options gives you so

many opportunities to profit...helping you earn the cash you and your family need and more.

Well, that's the reason I'm releasing this program... so that other regular, average folks can use it. This course will help you produce consistent winners often, and over time, so you can enjoy seeing your capital grow to the million dollar plus mark.

This course makes trading options as safe and profitable as possible... automatically setting you up for the most profits with the highest amount of safety.

Just think... follow the simple instructions in my course and you could have a fat chunk of money in your account! You'll be following the same system I used to pull in \$2 million in my account.

## **Why Options Are The Quickest Route To Big Profits**

I feel options are the the best way for any trader to make a lot of money in the market because risk is fixed and profit potential is unlimited.

In fact, buying shares of a stock could cost you thousands of dollars... but you can buy an option on the same stock for a few hundred dollars.

For example, if you bought 100 shares of a particular for \$60 a share... you'd spend \$6,000. But say you bought a \$60 call or put option on that stock for just \$600.

The cool thing is, you will have control over the same \$6,000 worth of stock... but you're only putting a fraction of the money up front.

And since you're not tying up as much money, you could make a lot more profit Not to mention... you've limited the amount of money you could lose to the \$600 you've put in.

## **So You Have Limited Risk, but unlimited return!**

That's the biggest reason I enjoy trading options... they require less money up front, but can offer you higher potential returns.

**Here's another example.** Let's say you have a \$600.00 stock. You buy 100 shares, which costs you \$60,000.00. If the stock moves up \$5.00 to \$605.00, you make \$500.00.

\$60,000 is a lot of money to put on the line to make \$500.00 (1% return on investment). Instead, you could play an option. Lets say the 605 Call is at \$3.00. If you spend \$60,000 on this option, you would have 200 contracts.

And on the same \$5.00 move in the stock, your 200 contracts are now probably worth DOUBLE (100% return) what you paid for them. You'd walk away with \$40,000.00 to \$60,000.00 in profit.

As you can see.... trading options gives you the leverage you need to make more profits with less money up front. I guess you can say options offers...

## **“More Bang for your Buck”**

Options offer far more profit opportunities than regular stocks. The downside is, they can be complicated to learn and trade... which is why so few people know about them or use them.

But I can change that for you quickly and easily by sharing my pricing formula!

This ability to use leverage to exponentially grow your money is why I've focused on options for the past decade. Which is why if you'd really like to make serious money in this market, I suggest you follow my advice and use options to your advantage.

What's more, if you don't know much about options or how to trade with them... that's all about to change. I've spent years painstakingly creating what I believe to be the most powerful options course for anyone wanting to learn how to trade them.

You don't need trading experience, knowledge about markets, or how to trade.

## **And there's nothing complicated about this**

Because it's so easy to use and so affordable, now you have no excuses for not changing your financial future and your family's future.

You need a simple, safe, reliable, day by day plan that brings you wealth gradually over time... not a get rich quick scheme. The best way to get rich is slowly and gradually... and this course and trading options can help you do it.

Look, the fact is... trading options is a simple way to earn a giant pile of cash when trading the way I'll show you. It doesn't matter if you have previous trading experience or if you know next to nothing.

Trading options gives you an unlimited upside with a limited, fixed downside – meaning you can turn a tiny amount into a bundle of cash! When you trade options... you're putting the power of leverage in your court and you're rewarded *exponentially*. See, options allow you to control the stock for a fraction of the cost of owning it...

## **The Financial Gain This Offers is Unlike Anything Else**

Best of all, options allow you to own and profit from certain assets at a literal fraction of actually owning them.

That's because you're “renting” the assets and paying a small price for the privilege to do so. Believe me, the profit potential with options is huge... almost unlimited.

In fact, it's amazing how much more money you can make when trading options, and it all has to do with the leverage you gain and how you can grow your profits exponentially.

I want to show you how to tap into the options market to make a lot of money. This is something I feel I'm MEANT to do, to give back to those folks like my Dad, who lost everything because of typical, old fashioned "retirement plans" that do nothing but leave you penniless at an age when you need the money most.

I know exactly how you feel, in fact I felt the same way when I started. And up until recently, there WAS a big learning curve. But I've been able to simplify everything and find a simple way to see results faster and easier when trading options.

So let me show you that way, right now. The problem that a lot of traders have is, they stay away from options simply because they don't understand it. How it works, the lingo, the process, and other stuff that sounds confusing on the outside... but really once you learn the simple formula, it's like following a recipe.

When I was younger, it wasn't until I was working at a firm that I started learning the ins and outs of options trading.

And when I left that firm, I quickly realized that a LOT of traders were probably just like I was at one point: not wanting to get into options trading because I didn't understand the basics of it. I just knew that if I could simplify this entire options trading thing... more people could use them to add another way to make money in the market.

After all, people who are unfamiliar with any kind of investment or security... they are not likely to invest in them. and that's too bad, because I learned first hand just how profitable options can be... and the amount of leverage they offer.

So, it was then that I decided I was going to explain the entire options trading process as simply as I could. I wanted to start right at the beginning... start with the fundamentals and basics... and go from there... until you feel 100% ready to venture into the highly profitable world of options trading.

I've created a course that does one thing: Takes the complicated out of trading options and gives you the simple, basic rules and tips that anyone can use to succeed with options a lot faster and easier.

Again, I feel that everyone who wants to be involved in trading or investing should know about this options trading portion, because of the returns it can offer. I've learned that too many investors haven't gotten into options trading simply because they didn't know how to go about doing it. I've tried to explain what options are in this article, but its hard to do it justice in a short article.

So, if you want to learn more about options because of the sheer profitability that they can provide, you can learn a simple, proven method of getting into the profitable world of options trading by picking up my course...

This course will give you the sound strategies you'll need to know in order to profit as much as you can, with the least amount of risk.

## **Introducing my Options for Beginners System...**

Join my Options for Beginners system and you'll get an in-depth, step by step education on how to trade options for the biggest profits.

You'll learn all about how and why options can put more profit in your pocket in the shortest amount of time. Even if you've never traded options before, I'll walk you through everything you need to know.

## **My Students Have Been Raking it In Too!**

**The results really do speak for themselves...**

*I was a newbie in trading since last December. I lost a lot of money trading both equities and options. None of them had given me the confidence that I could be a full time trader any time soon. Sang Lucci's Options Training is the best course I have ever taken. The presentation of materials and the system he created make it so people from all levels of trading skill can learn his teaching. After his lessons, I am able to do my own research and plan for trades with the right risk management in place. I am no longer holding onto losing trades and feel very comfortable doing what I'm doing. Lucci and his team have given me such confidence that I have made the final decision of becoming a full time trader. I highly recommend this course to everyone who wants to be able to achieve success in trading. For me, this is a life changing opportunity. Thank you, Lucci! Monique C.*

*I really enjoyed the course your method helps clarify the already complicated market. In other words, your method simplifies it. In the chat room you have a relaxed, easy going atmosphere and show no frustration to us newbies to trading. Overall I'm very impressed and extremely satisfied with the course, I will recommend it to anyone that asks me about options. Most "web" based services are just out for your money and sorta "throw " the learning at ya and say, "here it is good luck". Your teaching takes your students through it almost like teaching your child to ride a bike... you are there for all your students and fellow traders. WAY TO GO Lucci, thanks a million. Regards, Larry S.*

*Loved the attitude and style of the class, I love to learn from teachers with "real-shit" personalities - no sugar coating needed. The class has changed my understanding of market analysis, speaking in general terms. I've been on the sidelines not trading for 2 years, while still watching everyday. I needed a proven mentor to help get me back into the game with a new mindset. I'd heard about tape reading before, but didn't completely understand exactly what that meant. I finally pulled the trigger on this class with the intention of getting back into the market. One of the biggest positives of the is using examples of trades from that trading day. This is great considering many online education programs like to highlight huge trades they made years ago. I'd absolutely recommend the class.-Dan M.*

*Thank you Lucci and Peter! Thank you for keeping it real and not selling BS class about strategies that will make me rich or some super chart patterns. Thank you because now, even more than ever, I am gaining the confidence that I can actually make this happen without the help of anyone but myself. You have given me the skill sets that are now the basis of my trading.-Sebastien S.*

*Lucci taught me how the really market works. He goes deep into the methodology of trading large cap stocks and shares his wealth of experience gained trading throughout the years. I only wish I knew*

*about Sang Lucci many years ago before I blew up a few accounts. Thanks for all you do! Salu S.*

*The real deal for successful options trading. Highly recommended. No BS , straightforward, useful instruction on how to be an options trader.-Steven C.*

*Very insightful and a definite confidence booster. Lucci's down to earth, easy to understand talk, combined with details of his own real life experiences help to change our perceptions and illusions of what a successful trader really is... Ben Z.*

*The Sang Lucci team has been really helpful with expanding my knowledge in trading options, and having the videos on demand is so convenient for my schedule -Thiago O.*

## **Here Are the topics in Introduction to Options course:**

### **Trading Basics (\$99)**

- Auction Process
- Candlesticks
- Charts
- Time Frames
- Types of Trades
- Short Selling
- Price Action
- Understanding Sentiment
- Supply/Demand Dynamics
- Technical Analysis and Indicators
- Building a Watchlist
- Sanglucci's Watchlist

### **Options (\$249)**

Why Trade Options

- What is an Option?
- What Calls and Puts
- How You Read An Options Chain
- Sanglucci's Equation for Pricing an Option
- The Underlying Stock
- Time Decay
- Volatility
- Equation For Pricing An Option: Revisited
- Puts vs. Shortselling
- Characteristics of In Money vs. Out of the Money
- Different Classes of Options: Weeklies and Monthlies Focus
- Profit vs. Loss Potential

### **How to Use a Trading Platform (\$149)**

Priorities for Choosing a Platform

- Customizing Layouts
- Adjusting Settings to Maximize Performance: Sang's Setup
- Hot Keys
- Multiple Chart Time Frames

### **Bonus: Psychology (\$249)**

Market

- Headline Risk
- Bullish/bearish sentiment
- Anticipation

- Earnings
- Personal
- Challenging your fears
- Taking losses
- Taking Winners
- When to Size In
- Value of NOT Trading
- Building Your Own Trading Style
- Why Do We Trade?

## **It's THE Most In Depth and Valuable Options Course...**

You can get started on your own profitable journey towards making more money from trading options. I'll show you how learning how to trade options can fill your pockets with bigger and bigger profits and gains than your normal stock trading.

I've since coached 1000's of traders and quickly noticed the big mistakes that most of them made... preventing them from making the most money from the markets. This course will cut through all of my mistakes and the ones you COULD make... so you can make money faster.

Everyone is going to make mistakes, but in trading, mistakes are expensive. That's why this course can pay you back tenfold... because it will help you avoid the same expensive mistakes I made.

**Again... I lost \$350,000 from straying away from my tried and true principles.**

More than anything, trading is about following proven techniques and tactics... using a system that works and HAS worked and will continue to work.

## **That means you need to know what you're doing**

And the best way to gain that knowledge is to learn from someone who is a trader and a coach. If you follow a trader who can't explain how to do certain things right, or tell you the best trading techniques... you're going to have problems.

Not only that, but if you follow just a coach who doesn't have real world trading experience... you're not going to learn what really works in the trenches... and how to adapt to changes in the market as they happen.

Unfortunately, there aren't too many coaches who are also great traders these days. Either coaches just coach, or traders just trade. **It's rare to find one who does both well.** And honestly, that's why I feel I'm different and can offer you something that no one else can.

There's a big difference between a trader, an expert, and a coach. In fact, some of the best traders I know can't coach... and couldn't tell you the difference between a put and a call.

Why? Because they've been trading on their own for so long, they have no idea how to explain their steps or their ideas.

## They simply don't know how to teach or coach

Sure, they're good traders, but bad coaches. That's one of the things that makes me so unique. I started teaching other traders at my first firm the moment I became profitable. And once I launched my website, I started teaching hundreds of students a month.

All while trading professionally at the same time. I've learned to stay sharp and very profitable as a trader while also improving my teaching and coaching skills. For me, both are important.

Sure, I want to make the most money possible from the market... and that means staying sharp and on top of trends as a trader.

But I also want to pass that knowledge along to others who want to change their lives and make money as a trader. So, I have to stay sharp in being able to teach as a coach. In fact, the better I get at coaching, the better I get at trading. Coaching helps me stay focused on what works and what truly matters... so it keeps my trading skills sharp. It helps me to be reminded and understand why I do what I do.

-----  
*I started trading with Sang Lucci at sanglucci.com back in 2010. With the changes in this market I had to adjust my trading style and adapt to the changes and the way this market is being traded. Already being an experienced trader was not enough to overcome the obstacles in the market that were holding me back. The old ways were no longer working. Sang Lucci has improved my level of trading ten fold. He has taught me to control my risk and to take losing trades off a lot faster than I would have before and when the market is trading choppy or sideways I have learned to not trade at all. Most trading teachers give you signals and tell you when to take a trade. Sang Lucci not only teaches you how to do it yourself but more importantly how to make a lot of money doing it. The chat room is great. Being able to trade with like people that trade the same style is important. I'd never have been ready to trade full time and make a living doing this if it were not for Sanglucci.com. ....JC*  
-----

## What Makes Me Different than Other Coaches...

- I'm honest. I'll show you pictures of my LOSING statements just as fast as my winners. After all, any trader who HIDES their losses are lying to you and only after your money. You can't trade for any amount of time and not have some losses. If you're going to make money, you need to know the truth. All of it... and that's what I'll give you.
- I've put in the hours and the hard work in the trenches. I've spent well over 11,000 hours trading and coaching in 2014! Let's just say... you get really good at both when you put in that much time to sharpen your skills.
- I work hard every single day. It doesn't matter what happened to me the day before. If the market is open, I'll be there. I may not be placing trades (you have to learn when NOT to trade), but I'm definitely studying the markets and plotting my next move. I teach my students to do the same.
- I keep it simple and easy. It's so easy to over complicate things, especially with

options. I make it easy to make quick decisions because my pricing formula is accurate, reliable, and easy for me to use.

- **I've used this system to work my way up from losing \$350,000. I currently do this each day, so I practice what I preach, and these same steps made me \$2 million,**

I'm different from the rest of the "gurus" who either coach, or they trade... but rarely can they do both well. You'll want to learn from someone who is truly successful in trading... someone who is successful enough to manage funds. 99% of ALL coaching or trading programs on the internet are NOT created by traders, they're created by internet marketers.

So just remember that not all "successful options traders" are equal. **Most successful traders don't teach. They don't have too. I feel like it's something I MUST do... because of what happened to my Dad when I was young.**

Like I said – this is the exact same trading system I use for my fund management... the same one I use to manage millions.

See, I'll teach you THE most profitable trading methods, so you can get started in the lucrative world of options trading. You'll learn what trading options is all about... what you need to get started... and how to make the most money possible. Follow my lead as the course takes you through the whole process and demonstrate exactly what I do.

This is literally a roadmap, a blueprint, a formula for achieving financial freedom using options. Like I said, I made 2 MILLION dollars with this information. I can shortcut the process for you! I know it may surprise you that I'd be willing to teach you this stuff.

## **But honestly, it's my way of giving back**

When I first started, there was no one there to help me or show me what to do. So I told myself that if I ever made it, I'd give back by showing others how to do it.

Well, that's the main reason I made this course. I've done incredibly well and I want to help you learn the very basics of trading options.

Over the past few years, I've been showing ordinary people how to make a consistent income from the options. I love getting emails from students who are living better thanks to what I've taught them. Even if you've tried trading options before and haven't had any luck... all you have to do is follow my instructions.

Look, if you're at a point in your life where you're just not happy... either because of the money you're not making or you're not happy with your job, your boss, or your lack of freedom... I'm willing to say that this will be THE best money you'll EVER invest on yourself!

By using the same trading techniques I'll show you, you can enjoy life on your terms. I'm offering you a step-by-step plan to profit from trading options. If you want to profit, you'll have

an experienced trader with a decade of knowledge working with you.

## **How Much Does this Cost?**

If you hired me, in person, to coach you, it would cost you close to \$1,000 per hour because of my current coaching rate. Because of my limited time I wanted a more affordable way to get my advice into more hands... which is how this course happened.

Think about this...if the only thing this course did was help you bank more profits consistently and easily... it would be worth at least \$500, right?

And if the only thing it did was make it so you were able to work for yourself, from home, and be your own boss... that would be worth at least \$500, right? If this made it possible for you to stop buying any more of those “trading systems” that promise the world but deliver nothing... that’s worth \$500, right?

If this course helped you earn \$15,000 to \$20,000 per month... that’s worth \$500, right?

The good news is... this course does every one of those things and more! But I’m not even going to think about asking you to pay \$500. In fact, it won’t even cost you half or \$250.

For a short time, you can grab this trading course for only \$97. I priced it affordable because I really want to get it in the hands of those who could use it and actually profit from it.

Your \$97 fee for this course will pay you back, thousands of times in the future, with the profits you make from your trading.

Without knowing the information you need to profit with options, you're going to lose more than the cost of this course. The money you lose from not knowing the inside shortcut secrets of trading options will far outweighs the charge for this course.

## **I've spent 1000's of Hours Trading and Coaching**

I've learned how to profit faster and easier with options... so my job is to cut out the learning curve and trial and error for you... so you can start profiting faster.

Look, my goal is to give you the advice and directions that help you profit faster and easier. I coach because I'm sick of seeing “gurus” that have no idea what they’re doing. I decided to coach because I wanted you to have a real, TRUE expert who will show you exactly what you need to learn in order to profit from options. I refuse to do what those other so-called experts do... which is just sell you BS to get your money. Whether you’re looking to make \$100,000 a year trading, or you want a \$2 million account like I've been able to enjoy, you can do it faster and easier by learning from my course.

## **But why not find that out for yourself**

I'll show you how to harness the power of LEVERAGE by using options to pull in profits exponentially. If you know what you're doing, you can make more money trading options than you EVER could at any kind of job.

That's why this course can change your life on so many different levels. You can spend more time with your family, with friends, and work when YOU want. And yet, the money you make can allow you to enjoy life to the fullest...

When you become a consistently profitable trader like I can show you, just realize you'll never have to worry about money, bills, or debt again.

With the information I teach you, you'll be able to live life in your own terms. I've taught 1,000's of traders to live the kind of life they only DREAMED was possible... a life where they can do anything they want and afford anything they want. New cars, vacations, dream homes, nice restaurants... when you're truly making life-changing money with options trading...

## **Life gets REAL Good, Fast**

Make no mistake, options are the fastest and easiest way to make a lot of money in the market... without needing a lot of money to start. With options, your risk is limited to the amount you invest. Yet the profit potential is unlimited!

When you can use the power of options, which gives you unlimited profit potential with limited risk – you can turn hundreds into thousands and thousands into tens of thousands.

**Bottom line, options can give you 5 to 10 times the profit potential compared to buying and owning the stock outright.** You don't have to take a lot of risk to profit with options.

I'll walk you through everything you need to know. You'll learn exactly how to make money in the options market and get everything you need to enjoy more trading profits.

I've put everything I've learned during the last 10 years into a simple and easy-to-follow course that will walk you through how to profit and prosper with options trading.

## **Take 60 Days to Trade like a Pro Without Risk!**

I know I've made a lot of promises in this letter. But I don't expect you take my word for it. That's why I'm going to put all the risk on my shoulders, where it belongs.

Try it out my Options course for a full 14-days completely risk-free. If after 14-days you don't feel it's worth every penny... if you don't feel like you're learned enough to make money while trading options, then you get an immediate refund with no hassles and no questions asked. This is your chance to start learning what it takes to prosper in the very lucrative options market... growing your income and retirement account. I'm talking learning how to use options to grow your bank account time and time again!

\$97 is a fraction of what it will make you in profits. I KNOW first-hand. All you need to do is follow instructions you learn from this course.

So just go ahead and try the course for a full 14 days so you can see the profit potential of it. If for any reason you're not 100% delighted with it ... if you're not making the kind of money you want to be making... let me know and you'll get every single cent back without any fuss.

This is your chance to try out my training course and learn how to use options to pull in bigger profits from the market. This is your chance to experience firsthand what it feels like to make a lot more money simply by learning the true leverage and power of options.

**As I've said, this is the same instructions I personally used to grow my fund to over \$2 MILLION dollars... so there's no question this works!**

## **Try it and See How Powerful It Is for Yourself!**

I hope you'll see this as an investment in your future wealth, since my aim is to help you get REAL WEALTH, the kind of money that changes your grand kids' lives. The kind of money that pays for the lifestyle you dream about.

The kind of money that allows you to pursue your life's dreams, travel the world, and do what you want. Once you have this knowledge under your belt, you can go from zero to living a life of luxury.

So why wait? If you're fed up with watching other people enjoy their dream homes, nice cars, exotic vacations, and all the fine perks of life that YOU deserve too.... you can use this course to learn how to make a LOT of money, quicker and easier.

I did it, my students have done it. Now it's YOUR turn. I'd like to be your personal guide and show you how to tap into this easy money source.

I speak from experience when I say if you want REAL financial security for you and your family... trading options will do it.

Remember, I've used this myself to build a \$2 million-dollar account. I still use it, to this day, so I know what I'm talking

I've about! If you're ready for a profit-packed ride... if you're ready to tap an infinite well of available cash... go ahead and trade the low-risk way that brings you HUGE profits.

## **The Best Money You'll Ever Spend...**

Some people spend \$150,000 over 4 years to earn a college degree that keeps them in debt for most of their lives.

With this course, for just \$97... you can learn information to make more money than doctors, lawyers, and CEOs... and in a fraction of the time. I want to empower YOU to follow in my footsteps to a better life... so order now and get this course so you can profit faster and easier with the options market.

I'll be with you each step of the way... giving you everything need to know. You'll soon be doing your first trade and on your way to making an incredible living.

## So you Have an Important Choice to Make Here

You can keep doing what you're doing...staying frustrated with the way things are now. Think about where you'll be if you don't take action now. Where will you be in 3 months, 6 months, or a year? Most likely in the same spot you're at now. Is that what you really want?

Remember, if you keep doing the same things over and over again, you'll get the same results. If you're tired of not having the money you want, if you want to be free from money worries, if you don't want to listen to a boss for the rest of your life... **you need this course.**

This is a very small investment when you consider the returns you'll get. **Today could be the turning point in your life you've been waiting for.**

Remember, I do this for a living, so I know what I'm talking about! This is your chance to live life on your own terms. You deserve this. It's important that YOU'RE happy!

The best thing to do is to act now. So go ahead and take the next step. You can finally turn your financial situation around, once and for all.

**ORDER**

Sincerely,  
Sang Lucci

**P.S.** I'm going to empower YOU to follow in my footsteps to wealth. And you risk nothing with the guarantee.

The only risk is the risk you'll miss the chance to change your life. I'm providing all the advice you need to make sure you're profitable as soon as possible. If you want to make a living from trading options, I'll get you there.

Join today and get the information you need to change your life and make more money trading options than you've ever made before. You don't need to know anything about options...you only need to follow my directions.

I'll reveal everything I know and all of the secrets I've learned over the last 10 years of trading the options market. So go ahead and order now while it's fresh on your mind.

**ORDER**
