

***17-year trading veteran who has been consistently beating the market since 1998 reveals the ONE trading secret he uses most often to bank more profits...***

## **“If You're Ready to Consistently Profit from the Stock Market... This ONE Secret Will Help You Cut Through the Noise and Enjoy the Best Trades, Gains, and Returns Possible... Guaranteed!”**

**Each and Every Week... I'll Show You What to Buy, When to Buy, and When to Sell... Making It Incredibly Easy to Trade in a Calm, Calculated Manner... *So You Book Bigger Profits More Often***

**If you want a faster and easier way to pick winning trades... I'll show you how I've been able to cut through the clutter and instead, focus on the highest probability trades... so you dramatically increase your odds of profiting each trade.**

**Read below as I show you the ONE trading secret that has led to more profits than any other for me over the past 17 years.**

Dear Trader:

Are you tired of trying to figure out what makes a good trade *and what doesn't*?

Would you like a fool-proof way to determine when you should trade... *and when you should steer clear from the market*?

Would you like a faster, easier way to cut through the noise and clutter of the market... so you can focus on specific stocks that are ready to move? Are you fed up with puny returns, lost gains, or NO gains from your trading?

Well, if you want to increase the odds of making good gains and healthy profits each time you trade... ***you'll want to read this letter.***

Hi, my name is Serge Berger and I've been an active trader since 1998. I'm known in the financial circles as the “Steady Trader” because of my ability to consistently profit without any emotion coming into play. I'm cool as a cucumber when it comes to my trading.

I've also been a financial analyst, I've dealt in fixed income instruments at JP Morgan, and I was a proprietary trader in equities, equity options and futures. I'm also a best-selling author.

Now, the reason why I'm writing is because I have something that can make trading FAR more more profitable for you. It's by helping you cut through all the noise and clutter that's rampant in the market.

That way, you can focus on JUST the things that matter when it comes to winning trades and

banking profits.

**Let's face it. *We live in a noisy, noisy world.*** With the internet giving you 24/7 access to any financial market in the world... and with 24 hour TV programming like MSNBC or CNBC giving you market, trading, and financial advice around the clock.... ***it has become overwhelming.***

## **How Do You Know What to Trade? Or When to Trade?**

Who can you trust for advice? How do you know when the markets are good to enter?

How can you cut through the noise? How can you sift through the clutter and come away with an effective method for enjoying bigger winners, more often?

**Well... that's what I'm here for.** If you're ready to enjoy steady, consistent, and reliable profits... I can help. See... over the last 17 years... I've created a trading method that has allowed me to figure out the BEST situations to enter the market because that's when the most opportunity was.

Due to specific information, I've learned what causes the market to MOVE when it does... and more importantly...

## ***How You Can Use That to Your Advantage to Profit***

These days, I can spot good trades clearly and determine which strategies to apply in certain situations.

In fact, I've learned a specific method of trading that has allowed me to GREATLY increase my returns and profits from trading.

How? Simple. I focus on the highest probability setups, in the best market environment, and do it following strict rules. If that sounds like a lot, *don't worry about any of that right now.*

Over the next few minutes, I'll explain my consistently reliable trading method in detail... and also show you why I can help you book profits a lot faster and easier and more consistently.

For 17 years now... I've consistently beaten the market and won a lot more trades than I've lost... ***banking a lot of profits along the way.***

## **And I Honestly Owe it All to ONE Tactic!**

And it's been this secret that's helped me and my subscribers to enjoy bigger profits.

If you're a new trader who hasn't made your first trade yet... I can cut out the trial and error as well as the long learning curve most traders go through.

If you're an experienced trader... I can help you get rid of all the information you don't need...

so you can focus on *JUST* the stuff that works and that's profitable. No matter what level of trader you are... I can help you win more trades, enjoy bigger gains, and bank bigger profits.

## Let Me Paint a Picture for You...

For most traders... their mind resembles the ocean during a hurricane: Huge waves crashing against the shore... making so much noise. It's tough to focus and concentrate.

There's this website that says one thing, this TV show that says another.

Who do you listen to? Again, a LOT of noise. But with the strategy I'll show you... your mind will be more like a serene lake on a calm summer's day. The water is so calm, *it looks like glass*.

With a trading mind like that... you can calmly look for certain things you **NEED** to have for a good trade to take place. I'll show you what to focus on when it comes to determining how to spot a good trade... ***so you only have to focus on that.***

## Everything Else *Falls by the Wayside*

When you're able to trade without emotion... when your mind is calm like that peaceful lake... it's much easier to focus on what actually works.

Trading like this only comes from years of experience. And I have 17 years of it to be exact.

It's this length of trading experience that has allowed me to take a step back, observe what works best, and use that... *cutting out the rest.*

And one of the biggest things I've learned over my 17 years of experience is this: there are GREAT times to be actively trading...

## And There are Times You Should be on the Sidelines

When I first started trading back in 1998... there wasn't nearly the same amount of noise, clutter, and 24/7 trading information as there is today.

Because of that... I was able to learn specific methods for trading only under the most profitable circumstances.

And now... even with our wired world and 24/7 TV shows, and so much noise and clutter being thrown at you... the same methods I learned 17 years ago work even better today.

Why? **Because they help you trade with a clear, focused mind.** They help you trade under the best possible environment.

They help you focus on a few select things that matter in the market... *things like certain sectors at certain times, or certain events that will cause certain things to happen.*

# We Want to Trade When Certain Events Happen

Certain trading environments tend to provide certain profitable trading opportunities.

I can show you how to be on the look out for those. Instead of worrying that you need to look through 100 charts, or find reports and graphs on 50 stocks... I'm going to show you how to cut out the noise, focus on what's important, and make trades that *pull in bigger gains and bigger profits*.

Instead of trading in the most volatile markets... I've managed to learn about certain events and situations that let me know it's the perfect environment to trade.

And the flip side is... I've learned when to NOT trade, which is just as important as learning when to trade. **If the market environment isn't favorable... I don't trade.**

## This Helps Me Enjoy Larger Gains and Bigger Profits

Because I've been able to fine tune this system to the point it profits like clockwork... I've been asked if I can teach other traders how to profit more from certain market conditions.

So I managed to hammer out a system that only trades during favorable conditions... so that I can help newer traders increase the likelihood of winning trades.

I'm proud of the gains and profits I've been able to help my subscribers. That's right... for the past few years, I've been sending a group of subscribers a weekly newsletter consisting of very reliable "do this, then do that" advice.

This way, you cut out all emotion, blast through the noise, and focus on JUST those stocks worth trading. When you're able to cut through the clutter and find the best trades to make... it's easier to profit from the market. And that, my friend, is what I'd like to share with you.

## Introducing Hot Stocks to Watch...

**'Hot Stocks To Watch'** is my weekly newsletter service that gives you straightforward analysis and charts that break down the highest probability stock ideas for the week ahead.

Your analysis includes the charts, graphs, and information you need to go into the trading week with an unfair advantage.

You get 1 to 2 trades per week in stocks **priced roughly \$10 or less**. You can use these stocks to model me and trade without having to do a ton of research.

These 1 to 2 stocks I give you each week are pulled from the method I've perfected over the last 17 years. Nothing complicated...just precise recommendations on what to trade, when to enter, and when to exit. I'll also give you a weekly update on the broader market environment.

This service will have a built-in portfolio so that trades can be tracked. Once you see what's in

this newsletter... you'll see how it can help you cut through all the market clutter and noise that you don't need to pay attention to.

I can show you exactly what trades are best to focus on, how to focus on them, and how to execute them. I'll give you the WHY behind the set up and why I think it's ready to move and provide you with a fast, decent profit. I say fast because we're in and out in days, possibly a few weeks. But no longer than that.

Look, there's a ton of noise and clutter these days... and it's tough to cut through it all and find TRUTHFUL information that helps you make better gains and more profits with your trades.

See, mainstream financial media has 24 hour stations these days. That means they need a LOT of content in order to fill programming spots.

## **So Want to Know What They Do?**

They make up content on a daily in order to please their advertisers. They're in the business of selling advertisement, not in the business of making money for you.

So if you're getting any of your trading advice from TV stations... you're doing more harm than good. If you think they're giving you REAL world, up to the day financial advice... nothing could be further from the truth.

In fact, by the time you hear about a stock or asset from a mass media station... whether it's TV or radio... it's WAY too late for you to make any decent returns. That's because those on the "inside" have already taken most of the profit.

It's an unfair game, but it happens daily. That's why I took matters into my own hands... and put the odds of profiting back in my favor. Look, if you're ever going to make a decent amount of money from trading, you need a way to cut through all of this financial media 'noise.'

Well, as a member of my **Hot Stocks to Watch** newsletter service... you'll learn what REALLY moves the market, when to trade, and when not to trade.

If you're an active trader or investor... you can dramatically improve your winning trades and dramatically increase your profits once you know when the environment is favorable.

It's true. In my 17 years of experience... I've found that most gains come from knowing when the market conditions are ripe for success... so you can jump in and make trades that are set up in your favor...

## **Giving you Healthy Profits You Can Bank on**

And the flip side is... I've also learned from experience the times when it's best to sit out and **wait on the sidelines until the market conditions turn favorable again.**

Look, if the market isn't good and you have a chance of losing money... why not wait until

conditions improve and your odds of profiting skyrocket? I've been able to double my returns and profits by simply waiting for the right time to invest... and that also means sitting out when conditions aren't favorable.

The truth of the matter is, most 'indicators' and 'signals' are worthless unless they're applied in the right market environment.

If you don't understand the bigger picture of what's moving the market... where risks currently are coming from, the major economic, corporate, and geopolitical events, monetary policy, and more... then you're not trading or investing.

## **You're Gambling Because the Odds are Against you**

When you're not aware of the things that actually MOVE the market and cause certain assets to rise or fall... ***then you're not prepared like you should be.***

But, when you can cut through the noise and focus on the major economic, corporate, and geopolitical events like I'll show you... you're stacking the odds in your favor.

**THIS is how traders and investors get rich.** They do it by improving the odds of making healthy profits because they know the market conditions.

Again, the major economic, corporate, and geopolitical events move the market. So if you're aware of what to look for... you'll know when a good time to trade is and when a good time to be out of the market is.

By showing you what actually causes the market to move... so you can see for yourself when to trade... **it's like I'm teaching you HOW to fish instead of handing you a fish I caught.**

Sure, I could just hand you fish, over and over again. That's what giving you the trades to make would be like... if I didn't show you WHY. But what does that help you with over the long term? Nothing, really..

## **Because you'll Always be Dependent on Someone**

But if I can show you how the major economic, corporate, and geopolitical events influence the markets... *you'll know what to look for.*

This will make you self-sufficient as a trader because you'll know what to look for. And it would be like me teaching you how to fish, as opposed to just giving you fish.

My trading approach is how the major hedge funds successfully reap big profits in the markets. The big hedge fund managers understand that you can't trade a stock in a vacuum.

**You gotta look at the big picture and not just a short time frame.** You need to understand which sectors, groups, and asset classes are READY to rally....

# Giving You an Easier Chance to Profit With Stocks in Those Specific Sectors!

I can show you how to apply a high probability trading approach by understanding the broader market environment.

This means you'll know when the environment is 'high probability' and gives you the best chance to go in, make great trades, and enjoy bigger profits. Once you know what to look for... *you have an unfair advantage because you'll know how to spot high-profit entries.*

Again, this proven method is used successfully by billion dollar hedge fund managers. You can use it as well, so you can stop the guesswork and stack the odds in your favor... greatly increasing your chance of winning more trades and enjoying more profits.

Look, if you're interested in becoming profitable... realize that knowledge is power. And part of the power comes from knowing when NOT to trade as well as knowing WHEN to trade.

If you're looking to trade your way to a secure financial future...

## Follow Someone Who Has Figured this out

Someone who knows how to cut through the noise and clutter that mainstream media hands out... and instead, focus on the right trades, at the right times, using the right information.

Why trust your trading to financial programming on TV or online that's so mainstream... by the time they talk about it... *it's no longer valid because the profits have been sucked out of it.*

With this programming... you're listening to advertiser driven content... so you can be sure they care more about THEIR profits more than yours. If you want REAL financial freedom, the ability to travel anywhere, work from anywhere, do whatever you want... **that's what "Hot Stocks to Watch" offers you.**

I'm not looking to just hand you the fish, although I do that at first with my high probability trade picks. I also want to teach you how to "fish" in any market.. so you're self-sufficient and able trade by yourself without needing anyone else.

By giving you fish to start, while teaching you how to fish (learning how to use major economic, corporate, and geopolitical events) I can help you become self-sufficient in the markets. Knowing what you're doing means you're following specific market events so you know what sectors are ripe for profit and which to stay away from.

You'll know when to trade, when not to trade, and because of that... you can a lot more trading profits to your bank account. Believe me, after 17 years in the business, only a few things are worth paying attention to in order to consistently make money in the markets.

## Trading Does NOT have to be Hectic

But almost all traders make it out to be. That's why day traders don't make money.

In fact they lose a lot of money because there's too much noise and clutter... too much going on at once... and too much to focus on.

Most people don't have the time, patience, or knowledge to win at day-trading. Most folks don't want to sit in front of their computer all day watching their trades... being on edge and full of anxiety... waiting out each and every trade.

That's why my approach uses holding periods of a few days to a few weeks. This allows people with jobs, kids, or other commitments to actively engage in the markets in a low-stress, high probability way. By focusing on a few important things and cutting out the rest...

## **You Become a Consistently Profitable Trader**

It's true, by pinpointing when the market is in a favorable environment... when the market is ripe for trading and profits... that's when you want to be active.

I can show you which sectors/stocks you want to focus on in any given market environment. You'll also learn a high probability trade entry and exit strategy that leaves the guesswork out.

I focus on high probability market environments when the odds are in our favor. I then focus on the sectors/groups/stocks that favor the current environment... *which dramatically increases the returns and profits you make.*

When you become a high probability-focused and patient trader... ***you profit a lot more.*** Understand that there are times the market is great to be trading in and other times where it's not favorable. *These are the times you want to sit on the sidelines.*

Again, saving money is as important as making it. If I can help prevent you from losing a lot of money, that's as important as helping you make a ton.

## **The truth is, I Can Help You do Both**

There are times where you want to be trading because the profits you can make in some sectors is easy as pie.

Other times, the sectors are stagnant and the only thing that will happen is you'll lose money.

That's why "gurus" who are trying to sell you an indicator or 'system' to trade all the time are simply out to take your money. Because there are many times during the year when the market environment isn't good to use that indicator.

And trading when you shouldn't be trading can mean over trading and losses.

**You know... *Stuff you Don't Want...***

To become a 'steady trader' you have to understand if the market environment is good to be active in it, *at that specific time*.

Brokers won't tell you this because they want you to constantly trade... which is what puts commissions in their pockets. The more trades you make, the more commissions they earn.

**So they tell you to trade year round.** Financial advisers don't follow the markets close enough and are not on top of market environments all the time. They couldn't tell you when the market is favorable to trade and be active in... and when it's not.

They're too busy selling broad products and services... things like life insurance, funds, and other items that they earn money on if they sell you on them.

Again, they don't have their ears to the market pavement like I do. Their knowledge about the markets is what the mass media spews out.

Like I said you can't make the kind of profits you want if you're listening to mass media clutter. If you're trying to follow someone who is NOT currently tuned-in to the markets in detail...

## **You're Not Making the Money You COULD**

But... by focusing on when the market is good to trade and which sectors/groups to focus on in any given environment... *you can eliminate unnecessary stress and financial losses*.

Not only that, you'll also have an easier time sticking to your trading plan than if you were to just go trading around in the market all the time... trying every approach without a real plan.

Look, when you focus on sectors/groups/stocks showing relative strength... and you focus on bullish reversals using candlesticks... those bullish reversals give us clear capitulation by the bears and opens the upside. **Your risk is defined and limited and there's great upside.**

Again, my goal is to start by handing you the fish (trades) you need to sustain yourself while you learn how to fish (trade) on your own. I wouldn't be doing my job if I didn't educate you on how to become a profitable, self-sufficient trader.

Each and every week, you can follow my advice and place the trades I recommend. When you do, you have an opportunity to enjoy consistent and reliable gains and profits.

At the same time, you'll be learning what causes the markets to move, what makes it a favorable trading environment, and when it's best to sit out. Again, I'm going to teach you HOW to fish...

## **While I Hand You the Fish to Get You Started**

Ordinary folks just like you are using my advice to see steady, consistent profits... trade after trade.

New traders, inexperienced traders, even seasoned traders who got tired of measly returns

can cut through the noise and methodically pick the best stocks to trade, in a favorable market environment that can skyrocket your odds of profiting.

Knowing the best conditions and market to trade in is something gathered over years and years of experience.

The best part is, you don't have to sign up for 20 advisory services, or spend hours pouring through stock charts, financial reports, or any other boring method just to find a few good potential trades. **Even billion dollar hedge fund traders use the method I'll teach you.**

Look, I've been trading profitably for a living since 1998. That's almost 20 years. I tell it like it is... so that my subscribers and those who rely on the truth can have a beacon of hope guiding them through the landmines of trading.

So if you want to enjoy consistent and reliable profits.. you have to cut through all the noise and clutter that's making it so confusing for traders. That way, your mind isn't racing, you're not distracted by a million things, and you can focus on ONE method that works.

That method is learning how to use major economic, corporate, and geopolitical events to determine the market environment. We want to trade when the market is ripe for profits... and sit out when it's not.

## **It's Really THAT Easy!**

While other traders look for the “get rich quick” stock tip that doesn't exist... you'll focus on this ONE specific method that's based on WHAT actually causes the markets to move. That way, you can use this time and time again to enjoy consistency and reliability.

Once you know how to use major economic, corporate, and geopolitical events that determine what the markets do.. once you know what to look for... ***you simply trade in that time.***

I know my trading method works, because I've been extremely pleased with the profits. Not only that, but with hundreds of subscribers following my trades, I must be doing something right because they'd abandon ship if I was LOSING money.

I believe that in order to be successful at trading, *you need to put as many odds in your favor as possible.* And knowing the major economic, corporate, and geopolitical events that affect market environments is *how you can be prepared to enter when it's profitable and stay out when it's not.*

After 17 years of trading I've learned what kind of environment is best for trading. I've experimented with MANY different strategies to find something that consistently produces winning trades and good profits.

And time and time again... the best thing I could do for myself was focus on this specific method and get rid of noise and clutter. I focus on waiting for the most favorable market environment possible so I can put the odds in my favor. And if there's a way to put the odds in your favor, you have a better chance of winning.

# That's Why I've Been Consistently Profitable

And it's why, since 1998, I've been able to prosper during the 2 big crashes.

It's true, during the tech bubble of 2000... I did very well because I was relying more on common sense instead of my emotions.

When I was seeing tech stock prices fly up through the roof... with no real earnings to back them up... I knew it wouldn't be long before it all came crashing down like a house of cards.

Again, I knew that the market was NOT favorable and at some point soon, the crap was going to hit the fan because there was no way to sustain these kinds of skyrocketing share prices.

So, sticking with my plan of only trading during favorable market conditions helped me actually profit during a time when most people lost their shirts. It was this common sense approach to trading that got me through the housing crisis of 2008 as well.

And not only was I able to survive those 2 storms...

## But I Actually Profited As Well...

That's how knowing the major economic, corporate, and geopolitical events that move the market can work in your favor.

Because you can be prepared and take the steps needed to protect yourself and your money. See, when there's too much noise going on, it's tough to make clear decisions. As a result, if something like the tech bubble or housing crisis happens... *you have no idea what to do.*

But, when your trading mind is like that calm, serene lake... you can focus and concentrate on finding the best trades that will produce the most profits possible.

And that only happens when you know what causes the market to move... when you know how it all works and have a plan based on that.

When you know what you're looking for... you're able to focus, grab the trades you know will offer the best chance to win, and you can pick bigger winners more often.

That's the benefit of a system like the one I'll share with you. It allows you to cut out the noise and clutter, as well as the emotions that can cause traders to lose money.

When you're emotionally tied to a stock or a particular trade... you tend not to follow the system the way it's meant to work. You either hold too long, or sell too soon... and you don't allow the system to do its thing.

With my trading approach... I've been able to THRIVE through any kind of bull markets, bear markets, flat markets, and come out better off.

**And in all honesty, it's Because of this ONE Secret**

I trade only in the most favorable of market conditions... *so I increase my odds greatly!*

Thankfully... that has helped me pull out more profits from the market and greatly reduce risk.

And it all comes from following the major economic, corporate, and geopolitical events so I know the market situation, what will make the market move in a certain way, and how to best be prepared for that.

Like I mentioned earlier.. a dollar SAVED from a bad trade is like a dollar EARNED from a good one. So imagine how fast your money can grow when you get rid of what can lead to bad trades.. while greatly increasing your odds of making profitable trades.

That way, you don't lose money... but rather consistently make bigger gains and bigger profit.

Over the last 17 years... I've been able to find that perfect balance of reliable, consistent profits... while greatly limiting risk and enjoying a market environment ripe with profitable trades. And I know how to find them by focusing on a few important factors.

By trading in the most favorable environments... you greatly reduce the risk of losing money. I don't like losing money and I certainly don't want to risky my subscribers' money.

## **I Treat my Subscribers' Trades Like My Own**

Meaning... if it doesn't have potential to return a consistent profit... I won't suggest it. In fact, I'll only recommend trades based on my experience, system, and formula. You can be sure my strategies work and offer reliable, consistent, and SAFE gains and profits.

There's no way I'd last 17 years in the market if I didn't have a proven system that worked... one that helped me score more gains and profits from more winning trades.

Like I said, it mostly has to do with making sure the market is in a favorable environment before I even pick my trades. Using the major economic, corporate, and geopolitical events... I'll hunt and track down the trades I feel offer up the best chance of positive returns.

I've learned that noise and clutter is the enemy of a good trader. I rely on calm, concentrated focus.... in a favorable environment where I get rid of all emotion and rely on the technical and fundamentals I've learned since 1998.

With a lot of hard work and trial and error over the last 17 years... I've come to find out that **trading in favorable market conditions is the most consistently profitable way I've been able to trade.**

Having the ability to cut through the clutter, block out the noise, and laser focus my efforts on this one method is what makes my newsletter service more profitable than any other.

That's why I designed my newsletter and recommendation service around one of the market's most trusted profit-producers: Only trading in favorable market conditions, cutting out all the noise and clutter, focusing on ONE method, and getting rid of emotions when trading.

And if you'd like the opportunity to see solid gains more often... I'd love for you to use the same consistently profitable system I use.

With this **Hot Stocks to Watch** trading newsletter, I'm looking for particular set ups on certain trades. When I find them, I let you know about them. What's more... I use my experience, proven system, and a few tools I have to find stocks that are ready to make a move.

I'm not looking for long term "buy and hold"... I'm looking for stocks that are ready to make a solid move.. so my subscribers can bank some fast and easy gains in days or a few weeks.

## **Here's Just a Tiny Sliver of the Positive Feedback I Get**

*Jcp9731- Feb 26, 2015- Good technical analysis and suggestions for the trading range.*

*Xiaolinli-Feb 05, 2015- Hot stock pick is awesome! Serge is an excellent trader, and an excellent teacher. I would highly recommend it to anyone.*

*Carlesdevic- Nov 27, 2014- I am happy with this product. Only I miss a monitoring of the stocks, as go by placing the stops or undo a position when it goes in against.*

*patankar\_s- Oct 17, 2014- Looks like you were dead on about XLE hitting 85.70. Now its back down. Does it go down from here and hit 79 or is there another bounce likely?*  
*franz.marz- Sep 16, 2014- Very good, I like your style Serge!*

*DharminderKumar- Feb 18, 2015- Excellent Trading information*

*steveb2- Nov 25, 2014-I really appreciate the commentary and dedication every day. It is clear that Serge puts his heart into this. Thank you, Serge...*

*guobenzhao-Dec 11, 2013-This is a wonderful program. I like his picks and education and learn a lot.*

*Rvarvar- Mar 03, 2015- EXCELLENT research and advice*

*waynekochuk- Sep 11, 2014- Good dialogue with honest remarks. Very informative regarding the overall market and great on the recommendations. I like the technique and am using it in my stock selection process. Keep up the good work.*

*Richardmelgarejo- Dec 11, 2014- Great product. Love the insight. Holds up to its name "The Steady Trader"*

*marielayne- Jun 05, 2014- I love this service I consider myself a novice trader although I have my own charting system that I filter trade advice through. I love the simple yet detailed explanations this gives me. It's teaching me so much while making me secure with my trades.*

*Breakouttrader4581- Feb 22, 2013- Charting, charting, charting. I don't use it specifically to spot oportunities but this is what I was missing when looking at WHEN to buy. Serge you are great buddy. Thanks for helping me figure out what was wrong with my trading style. Cheers*

*maximomujica-Sep 25, 2014- The Steady Trader is one of the best products on advisory services for trading. Serge does a great job.*

*ItsMrThiago- Feb 25, 2013- Morning videos changed the way I trade. Keeps me in tune with what I should be focusing on before the opening bell. Mr. Berger is one of the best chart guys I have ever subscribed to.*

*Kyle.R.Bazzy- Feb 25, 2013- Serge Berger is one of the shining stars in the industry. He understands how to run an amazing trade alert service with great communication, empathy and a WEALTH of knowledge. When I was trading along side Serge at the time of his verification, I truly started to understand the importance of finding a good entry ON TOP of finding a good trading opportunity. Serge is great for all experience levels that are looking to learn how to add "chart analysis" in their tool belt.*

*Signaturetruffles- Mar 30, 2015- In addition to a morning review of the day ahead, can some insights be provided the day before so one may position stocks or options for the following day... would be more useful.... The Steady Trader is a great read always... Serge is approachable, knowledgeable, insightful, and always down-to-earth. Awesome service!*

*Vincent StJohn- Oct 02, 2014- I trade options, and I can say that using Serge's analysis and his trade positions as option plays, his summary allows you understand the trade in depth without too much or too little background. On my first day, I posted my trades open and closing prices, and netted \$400. The service Serge provides is excellent, as Serge does not fight the tape, rather finds the trades that make sense.*

*anna.wielopolska- Apr 01, 2015- Great help in everyday finding out what's going on markets. Maximum benefit comes with time, when you have already watched and read some of these points — then you appreciate their accuracy and conciseness. Thank you!*

*bill corso- Dec 31, 2014- Great product, received my subscription fee back on the first trade.*

*davidweisser- Feb 26, 2013- Serge has been very accessible to answer my questions with regard to the portfolio and general tutorial inquiries.*

*ZackArmstrong- Feb 27, 2013- Serge offer many set-ups both long and short. Great for an active trader*

*briansussskind- Apr 03, 2014- Serge is one of the best technical analysts I follow. He helps keep me in sync with the market's trend. I view 100% of his email alerts, daily.*

*AnnemetteManikov- Jan 29, 2015- I have only positive comments about The Steady Trader. Serge has very good approach to the market, it is easy to understand his trading ideas and they are very often profitable. The thing is that they work well if one trades stocks or CFD's, but unfortunately I am doing mostly options. Some of the signals can be applied to option trading and they are certainly useful.*

*Valeriebensinger-Oct 14, 2014- 5 - Very good information and direction. I also like the personal notes. That makes it seem more real.*

*Pattiminer- Apr 06, 2014- The perfect service for those who thrive on shorter term trades. And, Serge's explanations make it easy to understand why he says what he says. He's teaching me how to fish.*

*Nicholas Cox- May 07, 2014- Very user friendly service, the trades and the rationale behind them are all explained in layman's terms. All in all a great product!*

*Gassansleiman- Dec 23, 2013- I like the steady trader approach as he combines fundamental and technical analysis to his trade idea. So far I have achieved 80% win on his trade ideas.*

*"The daily market video provides an in depth technical analysis unseen on other sites. The thorough explanations on the intricacies of technical investing have made me a better investor/trader. The novice to pro can learn from the observations being made and the transparent strategies given." Brian Rachwalski, VP, R.J. O'Brien, Fixed Income Group*

*"Following your daily newsletters and understanding your trading methodology has allowed me to see the markets in ways I've never experienced before. It's amazing the clarity you get when realizing that opportunities occur in different time frames. I've gone from being a long-term investor to now also trading in a time-frame of a few weeks and it's been a real blessing to me. Thank you and keep up the wonderful work" Peter Binden - San Jose, California*

*"I wanted to thank you for the excellent insight you give in your daily newsletters and live in the chat room. Following your daily trading plans and analysis have made a huge difference in my bottom line and my trading skills. Thanks for all you do, it's making a positive impact." Mike Kaluri – New York, New York*

*"I'm a big fan of your approach to trading using the multiple time-frames. I currently have short and long positions on with different time horizons and it really is helping the profits accumulate in my portfolio." Henry Markowski – Orlando, Florida*

## **My System Allows you to Profit FASTER and EASIER**

Like I said, I hate losing money and I hate taking unnecessary risks with my money. And I certainly refuse to put my subscribers money at risk. I watch that even more closely.

Every time I look for a profitable set up and possible good trade, I think of my subscribers FIRST. Not my needs... but YOURS. And I treat every move as if it all comes down to making sure your money is safe... and more importantly, that you're going to make a nice big profit.

I think of that new addition you want to add on to the house. I think of that new swimming pool your kids would enjoy. I think of that new car your daughter will need when she heads off to college. I think of your retirement and how I want you to enjoy it, and not have to slave away working like so many people are forced to do these days.

Again, before I even mention a trade... I think of you and your money and how hard you've worked for it. **And I won't make a move unless I feel it's got solid profit potential.**

I make sure that the market conditions are favorable. Then, I look for a perfect balance of profitability and safety.

That's why I honestly feel that my newsletter service is THE best way to consistently beat the market, without putting your cash at risk. I've been a believer in this strategy ever since I started profiting from it like clockwork...

## **Enjoying FAR more gains and profits than losses**

I want you to think of me and my service when you're retired, lying on the beach some place tropical... thankful and grateful you decided to give my service a try. THAT is why I do what I do. If I can make that much of a positive impact in your life and your family's life... that

motivates me to get even better and better at this.

I've already spent 17 years mastering this method. My goal is to help you win as many trades as possible... consistently and reliably, so you can sock the profits away for retirement.

If you want a sure-fire, proven method that can help you win more trades, more often... so you bank more profits consistently... I can't think of another method that gives you this kind of consistent profit potential with this limited risk.

For the last 17 years now... I've been consistently helping everyday traders make bigger returns and more profits in the market.

I'm going to do everything in my power to make sure a trade has amazing potential and offers the chance for a big gain and profit... with less risk. Then and only then will I issue my recommendations to you.

It's because of this careful, methodical, tactical approach that I've been able to win so much, so often. By making sure the market conditions are favorable, by making sure I've cut out the noise... that's when I can find the picks I'll hand you. This method is why my subscribers have been able to consistently profit and make bigger gains, more often following my advice.

## **I'll Find the Stocks that Are Set up to Move in Your Favor**

It's this method of trading for the past 17 years that has allowed me to win much more than I lose. After 17 years... I know what to look for and I know what it takes. I figured if I'm going to be trading, I might as well take a few folks along for the profit ride of their life.

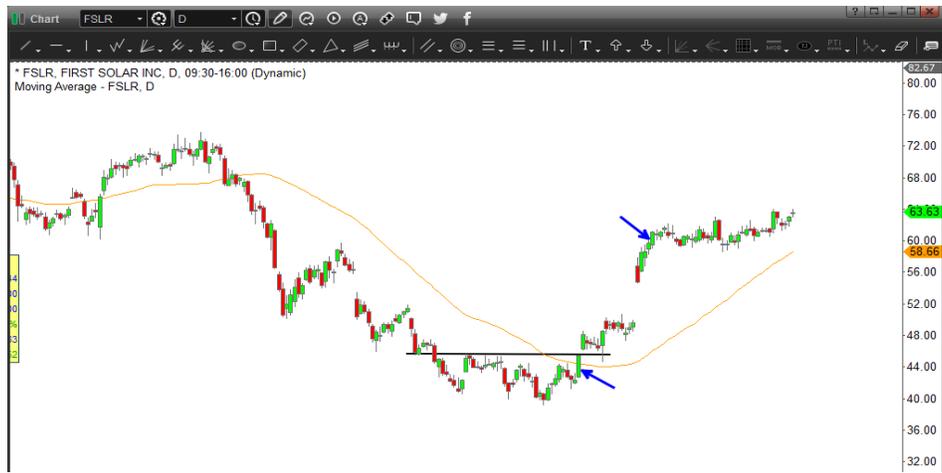

Again, my methods are based on major economic, corporate, and geopolitical events that influence market performance. Since I know what causes the market to move, I can forecast certain things that will happen... *because they've ALWAYS happened in the past.*

And since I'm so confident in my method... I'm more than willing to share it with other traders who don't have the experience or even time to find good trades. With my service, I can help you find trades that make money faster and easier than if you tried finding them yourself.

Like I said at the beginning... often times it's the noise and clutter that can work against you. With 24/7 TV channels blasting trading information... it can be noisy, cluttered, and confusing.

My job is to come in, cut out that noise and clutter, and help you focus on the stocks that are ready to make the kind of moves we want. THAT is why this works... because it shortcuts the learning curve for you.... helping you become profitable faster and easier.

**Let me Show you the Profits You Can Make...**

***By waiting for a favorable environment...*** the recommendations you get as a subscriber are your very best chance to consistently and reliably profit more.

In a minute, I'll show you how you can start getting my recommendations. It's easy... but more importantly, it's amazing how fast you can begin profiting from my reliable trading system.

Instead of watching TV, surfing trading sites, or spending hours going through graphs and charts... you can just open up my recommendations for the week... feel comfortable they're winners, and that you'll have a better chance of grabbing a nice return and profit.

And every recommendation I send has gone through a gauntlet of criteria... to make sure it's the absolute best recommendation I can give in a market environment that favors us.

## **That's why you'll make bigger gains, more often**

Could you find them yourself? Sure, with the information you have, and all traders have these days, you have a wealth of information at your fingertips.

And there lies the problem. It's this sea of clutter and confusion that holds so many traders back. It all becomes a blur after you've been looking at charts and graphs for hours.

If you don't know exactly what you're looking for... it can be tough to consistently win trades and pull profits from the market. Again, it's overwhelm that makes day traders lose money.

Thankfully, with 17 years of trading experience, my job is to help you cut out the noise and confusion using my market experience and system to increase your odds of winning.

I can help you stack the odds in your favor, by making sure the market environment is ripe for good trades and plenty of profits.. and then pinpoint you to the stocks I feel are set up to move in our favor.

Best of all, you can now receive my recommendations right from the comfort of your home... by subscribing to my trading service... **Hot Stocks to Watch**. The name, symbol, profit targets. You'll get up to 1 to 2 picks per week. I'll let you know **WHAT** to get into, **WHEN** to get in and **WHEN** to get out.

Very often, my recommendations will pay off sooner than later... since the market conditions are in our favor.

Instead of killing yourself trying to find one or two good trades after an hour of searching... just use my service and get them hand picked and delivered right to you. It's the fastest and easiest way to find trades that can return consistent, reliable profits like clockwork.

My purpose is to teach you how to fish (trade) using my proven method for finding bigger winners, more often. Because I'll show you what causes the market to fluctuate and what certain events mean for certain sectors...you can piggy back off this potential for profits.

I want to share my knowledge of trading and profiting with as many traders as I can. Traders who'd love to make bigger returns and more profits. Traders who don't want to spend hours trying to find the next good trade.

That's why I've decided to open my trading newsletter where I put all of my recommendations into one place, under one roof, so you can enjoy a safe and profitable trading opportunity each and every week.

This way, you don't have to worry about losing your capital because you weren't sure what to do with a specific trade. If you'd like a faster, easier, and much safer way to profit from the market, take out a subscription to my service. Following my recommendations is an easy way to boost your profits a lot faster than trying to figure it out on your own.

## Profitable Gains that 17 years of Experience Brings

For me, successful trading is all about market knowledge. It's knowing how certain major economic, corporate, and geopolitical events affect the markets and cause them to move.

**I'll show you how it affects certain sectors as well.** The combination of these allow me to find a favorable environment in which to trade... and increase the likelihood of finding trades that produce bigger gains and profits.

While I study charts and do market research as much as any trader... the one thing that gives me my biggest advantage is the fact I trade under the best market conditions and favorable environment. And I've learned what it takes to get favorable market conditions for traders.

Again, trading can be risky... so I use a combination of my 17 years of experience and then good old fashioned knowledge of major economic, corporate, and geopolitical events, and how they influence the markets and trading. That's how I find the best trades that offer the potential for great gains.

I'll tell you what to trade, when to get in, and when to get out with good profits. Since we're trading under favorable conditions... any trader of any level can use this service to enjoy bigger gains, more often. You just...

- (1.) Check your e-mail and review the 2 to 3 recommendations.
- (2.) Place the trades I recommend when the time is right
- (2.) Wait for the trade to materialize... selling and profiting when its time.

Once you've signed up, you'll get the email newsletter where I average 1 to 2 picks each week. I'll also give you one weekly update on the broader market environment. I don't want to just TELL you what to do, I want to teach you the reasons behind my strategy.

In short, you'll get everything you need to start profiting, just as many subscribers have.

Plus, you get the trading information you need to know about... so you can fish for yourself and not depend on anyone else.

As a member, you receive 1 to 2 potentially lucrative recommendations a week. I provide the **recommendations**. As soon as I uncover the opportunities for the week, I'll send an e-mail with specific recommendations. From there you make the trades for the week.

Every recommendation could multiply your money quicker than trying to find these trades on your own. That's all this is... cutting out trial and error by piggy backing off my experience. That way, you can enjoy consistent profits that add up to a bigger nest egg for retirement.

Again, when you sign up, you get a financial newsletter that gives you 1 to 2 picks per week **that are around \$10...**

## ***So You Can Trade with Volume and Leverage***

Each trade will last anywhere from a few days to a few weeks... this is more short term trading than long term. What I recommend should be moving soon, based on the market environment I know about.

It's certain market conditions that will influence certain sectors... so that's what you'll get. You get my recommendations – 1 to 2 delivered by e-mail each week. You'll know precisely what to buy, where to buy it and at what price.

You'll learn why I believe the stock is moving higher in a very short time. Think of how much easier it will be when you don't have to spend hours sifting through charts, graphs, and research. You grab my picks, make the trades, and enjoy the bigger returns.

To put it directly, there isn't a safer or faster way to boost your profit in today's volatile market. I've enjoyed a long 17 year history of successful, profitable trades... because of my approach to waiting for favorable market conditions.

That's when I'm active... and I'll stay on the sidelines if conditions aren't favorable. The recommendations are easy to understand so you can make the trade and exit when it's time... grabbing bigger gains and more profits.

## **Just Follow my Instructions All the Way to the Bank...**

If your returns haven't been consistent or high enough... my 17 years of market experience have helped my subscribers to consistently grab the kind of opportunities that are normally only reserved for Wall Street insiders or trading experts.

In fact, this is the best way for you to cut out trial and error... so you can speed up your own profits. If you want to see bigger gains and higher profits in your portfolio... you have an opportunity to be part of this service and use it to make the kind of gains you want.

I'll tell you the stock I recommend, the price, and the exit. Hopefully it takes shape fast so you can pocket gains even faster. Then each day, you watch the stock until it hits my target price.

Then you sell when you're happy with the profits you've made! Since we're trading only in the most favorable market conditions... you can be sure we're stacking the odds in your favor, so you won't have to worry about making haphazard trades that could jeopardize your profits.

Again, steady, consistent, and reliable gains can add up BIG over time. I promise you ... this proven method is designed to trade when the market is ripe and designed to hand deliver trades that show great potential.

You can just model after my picks and enjoy the profits they produce. It's been working for hundreds of other traders. And like them... I'd love to help you make bigger gains, healthier returns, and stellar profits that less experienced traders can't find.

I will help you identify high-profit potential trades that are set up for us to get it at a certain price, exit at another, and enjoy fast, easy profits. That's why we trade when the market environment is favorable.

**THAT'S where the real money happens!**

But either way, no matter how much you want to trade with... this service hand picks the trades for you. You simply follow my lead, model my trades, and collect the profits.

By capturing the steady, sure bets, you can make consistent profits every day. In other words, small, safe profits with less risk can add up to a huge bank account.

Many other newsletters will tell you numbers that you want to hear... just to get your money. But then you're left on your own. I offer a proven service that can only happen when you follow an expert trader. It's a real service proven to deliver real gains on a consistent basis.

I've learned, through 17 years of experience, how to spot certain stocks that are ripe to move soon. I'll tell you when to get in and when to get out... putting quick profits in your pockets.

I've made my subscribers great profits year after year.

## **I'd Love to Help you do the Same!**

All you have to do is look at what I recommend, make the trades, and exit when it's time.

Every recommendation has been hand picked by me and gone through a gauntlet of specific criteria. By the time it ends up on your desk... you can be sure I feel it's a proven winner ready to produce QUICK profits. In other words, I've designed most of my picks for fast profits.

**This is a volatile market. Up one day. Down the next.** Let me help you cut out the noise and reduce the clutter... then hand you the trades I feel are ready to move and put bigger profits in your account.

I've learned, over the last 17 years of trading, that the most favorable market environment works best. And that's a market environment in which most of the odds are stacked in our favor. It's so much easier to make money this way.

Imagine knowing, every morning you wake up, which stocks you'll own that week. All handed to you in an easy to understand way that takes away guesswork. You can enjoy a consistent and reliable way to profit from the markets, without needing to do the hard work yourself.

With my service, I'll show you which stocks are showing the perfect set ups to trade... so we can get in, get out, and bank quick and easy returns in a few days or weeks. We get in at the price I suggest, cash out at the predetermined target... and lock in healthy gains.

I can't imagine a faster, safer way for you to enjoy one winning trade after another. Subscribe to my newsletter service and you'll find the best trades that offer steady gains.

That's what my service is designed to help you do. There isn't a better time than now to start. The good news is, I've reserved a spot for you. Soon you can be making consistent profits.

## **A Very Limited and Time-Sensitive Opportunity**

What's it worth to be handed the best trades each week...to be on the receiving end of

recommendations that could help find the best trades for consistent profits time after time?

It's a true investment because it can help you grow your money faster and easier than if you tried to do it yourself.

Again, instead of just handing you trades so you're left buying advisory signals or indicators forever... I'll show you how the major economic, corporate, and geopolitical events influence the markets and make certain sectors good to be in.

## **To get started, just let me know and you're in!**

But you'll want to do it now because at the price I'm offering, these spots will fill up fast.

I'm offering an introductory trial price of \$99, which is \$100 off the regular price of \$199. As so many of our subscribers have told us--they make their investment back and more on their first trade!

Again, with the **Hot Stocks to Watch** newsletter, you'll get my consistently profitable recommendations delivered by e-mail. The recommendations are short and to the point. I'll tell you the opportunity, why it's a winner, the symbol, entry and exit, and the kind of profit I'm gunning for. The steps are so clear, even new traders can follow the advice.

How much money can you turn \$99 into when you're enjoying bigger, healthier returns and gains. You can follow my proven track record for consistent returns for a low price of \$99...

With my service, you get a newsletter with 1 to 2 trades a week. The way I see it, the fee is a LOT less than the profits you could make on just one trade.

## **The Best \$99 You'll Ever Spend...**

I know your time is valuable. So with my service, I'll help you find the best trades. I'll tell you what the opportunity is, when to get in and out, and how much profit we're looking for.

It's really the fast and easy way to piggy back off a 17 year trading veteran, so you can shortcut your own results and start enjoying the same gains a 17 year trading veteran enjoys.

Simply click [Subscribe Now](#) at the bottom. I'll be sure to get you started on your profitable journey right away by rushing you the recommendations I believe will move soon.

## **Check Out the System On Me... There's No Risk!**

I know I've made a lot of promises in this letter. But I don't expect you take my word for any of it. That's why I'm going to put all the risk squarely on my shoulders, where it belongs.

So take 30 days to decide if **this** is for you. If after the first 30 days you don't like what you see, I'll make sure that you get a full refund of every cent paid. No questions asked. This gives you a free chance to participate in my recommendations... so you can see for yourself that that this offers a true chance to profit.

Either way, if you don't agree that this could be the most profitable investment information you've gotten... if you don't see yourself making a lot more in profit than what you're investing for this newsletter... you get a refund. I'm willing to make you this offer because I'm confident you'll quickly see just how much money you can make with my newsletter.

If you're ready to get started, simply click the "Subscribe Now" button below to guarantee your spot. You'll have full access to the next recommendations.

I don't normally make this introductory price available, but I'm offering you this special because I don't want a few dollars to come between you and the wonderful opportunity my service offers.

## **Get in on the Introductory Rate and Save \$100**

If you'd like to make reliable, consistent profits while dramatically limiting your risk... If you'd like to discover how I gain reliable and consistent returns on each trade...simply click the "Subscribe Now" button below to guarantee your spot.

This is your chance to get on board something that's been making a lot of people a lot of profits in the market. Please don't miss out. Join today and your first gains should be in short order. Subscribe to the service today.

### **ORDER BUTTON**

Sincerely,  
Serge Berger

**P.S.** As a subscriber, you just don't profit from my stock picks, you get to learn the ropes while you profit without doing any of the hard work. So don't delay. Subscribe today, and become a more profitable trader in a lot less time!

Picking winning stocks has never been easier. Using my recommendations, I'll tell you with accuracy which trades are set to make you big profits.

Remember, this offer will be \$199 after the introductory period.

If you have any interest in significantly increasing your returns and profits from the market... here's the fastest and easiest way to do it. You've got a 30-day money-back guarantee to try it out while saving \$100.

So, go ahead and give it a try now... it's in your own best interests...
